

1

Order a CableCARD from your cable company

The TiVo Roamio Plus/Pro uses a multi-stream CableCARD decoder to receive HD and digital cable channels.

Order one **Multi-Stream CableCARD (M-CARD)** from your cable company and deactivate your digital cable box (if you have one). The M-CARD will replace your digital cable box. For CableCARD installation instructions, see the "Installing a CableCARD" insert that came with your TiVo Roamio Plus/Pro.

You don't have to wait for your CableCARD to set up your TiVo Roamio Plus/Pro. Continue to step 2.

2

Get to know your cables

HDMI® cables for high-definition video and digital audio. **recommended for HD setup.**

Ethernet cables for connecting to the Internet through a wired network (if not using MoCA).

Coaxial RF cables for receiving a cable signal and for connecting to the Internet through a MoCA network.

Power cord (included)

3

Connect to the cable service

Connect the coaxial RF cable provided to your TiVo to the **COAX (MoCA)** port on the back of the TiVo.

If this cable is connected to the TV or cable box, disconnect it and connect it to the TiVo (HD needed).

4

Connect to your TV

Connect an HDMI cable from the HDMI port of the TiVo to the HDMI input on the back of your TV.

If your TV does not have an HDMI port, see [this article](#) for additional installation instructions.

5

Connect to the Internet

The TiVo Roamio Plus/Pro uses a high-speed Internet connection to receive program listings, TiVo® service updates, and on-demand content. The type of network connection you choose will depend on what you want to do with your TiVo, and whether it's possible to connect to different cables in your TiVo house.

If you plan to stream shows from the TiVo box to other TiVo boxes, you must use a wired connection: Ethernet (Option 1) or MoCA (Option 2). But don't worry, no matter which one you pick, you can always change your mind later.

Option 1: Use Ethernet network

Use this option if you have a wired Ethernet network available to all TiVo boxes in your house and work. Otherwise, use option 2 (MoCA network).

This option lets you:

- Stream shows to/from other boxes
- Transfer shows to/from other boxes
- Stream transfer shows to iPad and iPhone®

Connect an Ethernet cable from the TiVo box's **ETHERNET** port to an open port on your router or to an Ethernet jack in your wall.

During Guided Setup (Step 7), choose "Ethernet" as your network connection type.

Option 2: Use MoCA® network

Use this option if you have a MoCA home network.

This option lets you:

- Stream shows to/from other boxes
- Transfer shows to/from other boxes
- Stream transfer shows to iPad and iPhone

Because MoCA is delivered through your own cables, and you already connected that cable in Step 3, you don't need to connect anything more here.

During Guided Setup (Step 7), choose "MoCA" as your network connection type.

Did you know? You can use the MoCA network adapter feature to your TiVo Roamio Plus/Pro to create a MoCA network throughout your home. See the "What's MoCA?" box at left for more info.

Option 3: Use wireless network

Use this option if you don't plan to stream shows between TiVo boxes.

This option lets you:

- Transfer shows to/from other boxes
- Stream transfer shows to iPad and iPhone

Note that this option uses the TiVo box's built-in wireless capabilities. You don't need to connect anything to this step.

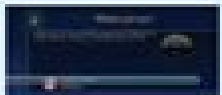

During Guided Setup (Step 7), choose "Wireless" as your network connection type.

7

Complete Guided Setup

Turn on your TV. After the TiVo box warms up, you'll see a Welcome screen.

When you see the Welcome screen, you're ready to begin Guided Setup. Just follow the on-screen instructions.

You should complete Guided Setup even if you don't get home a CableCARD decoder.

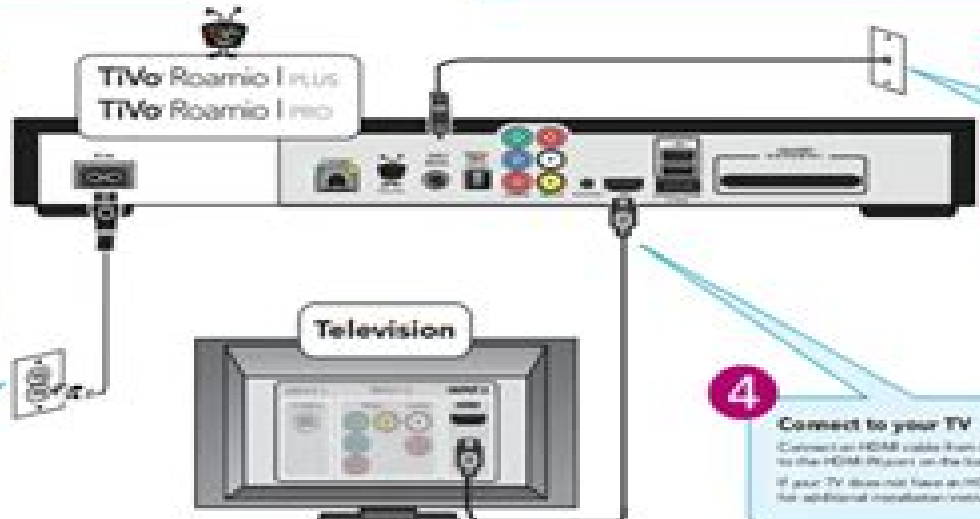

Note: If you don't use the Welcome screen, use the Input, Source, or Settings button on your TiVo remote or TV to select the correct video input source.

Once you've completed Guided Setup, turn the power over to technicians about using your TiVo Roamio Plus/Pro.

6

Plug in the power cord

The TiVo Roamio Plus/Pro must power through a system light at startup.

What's MoCA?

A MoCA Multimedia over Coaxial connection gives you the same high-speed connection you get with a wired Ethernet connection, but it comes through your existing coaxial cables that were once used to get cable TV. This is a great option if you have TiVo boxes that connect to your home network wirelessly.

A MoCA network lets you:

- Stream shows to/from other boxes
- Transfer shows to/from other boxes
- Stream transfer shows to iPad and iPhone

If you can connect an Ethernet cable to your Roamio Plus/Pro, you can use the Roamio's built-in MoCA network adapter to enable MoCA networking throughout your entire home!

Simply connect an Ethernet cable from the TiVo box's **ETHERNET** port to an open port on your router or to an Ethernet jack in your wall.

After Guided Setup, go to Settings in Network & Storage Network Settings. Then choose "Use MoCA" to create a MoCA network.

To learn more about MoCA, including other setup options, visit [this website](#).
