Breaking the Glass Armor Kristin Thompson, 1988-08-21

Classical works have for us become covered with the glassy armor of familiarity wrote Victor Shklovsky in 1914 Here Kristin Thompson defamiliarizes the reader with eleven different films Developing the technique formulated in her Eisenstein s *Ivan the Terrible* Princeton 1981 she clearly demonstrates the flexibility of the neoformalist approach She argues that critics often use cut and dried methods and choose films that easily fit those methods Neoformalism on the other hand encourages the critic to deal with each film differently and to modify his or her analytical assumptions continually Thompson s analyses are thus refreshingly varied and revealing ranging from an ordinary Hollywood film *Terror by Night* to such masterpieces as *Late Spring* and *Lancelot du Lac* She proposes a formal historical way of dealing with realism using *Bicycle Thieves* and *The Rules of the Game* as examples *Stage Fright* and *Laura* provide cases in which the classical cinema defamiliarizes its own conventions by playing with audience expectations Other chapters deal with Tati s *Les Vacances de Monsieur Hulot* and *Play Time* and Godard s *Tout va bien* and *Sauve qui peut la vie* Although neoformalist analysis is a rigorous distinctive approach it avoids extensive specialized vocabulary and esoteric concepts the essays here can be read separately by those interested in the individual films The book s overall purpose however goes beyond making these particular films more accessible and intriguing to propose new ways of looking at cinema as a whole

of reconstructed doses prompted Congress to have the General Accounting Office GAO review the dose reconstruction program used to estimate exposure The GAO study concluded that dose reconstruction is a valid method of estimating radiation dose and could be used as the basis of compensation It also recommended an independent review of the dose reconstruction program The result of that recommendation was a congressional mandate that the Defense Threat Reduction Agency DTRA a part of the Department of Defense ask the National Research Council to conduct an independent review of the dose reconstruction program In response to that request the National Research Council established the Committee to Review the Dose Reconstruction Program of the Defense Threat Reduction Agency in the Board on Radiation Effects Research BRER The committee randomly selected sample records of doses that had been reconstructed by DTRA and carefully evaluated them The committee s report describes its findings and provides responses to many of the questions that have been raised by the veterans
