Tolliday,1998-11-19 Recent years have seen intense debates among management and academics on the rise of lean production and Japanization Some authors have stressed the universal impact of new forms of work organization and best practice while others have questioned the limits of convergence stressed the weight of national contexts or societal effects or highlighted the evolutionary effects of unpredictability in the external environment The international automobile industry has been a focus for much of this debate and this book written by a team of leading international researchers in the field uses this industry to examine in detail the actual practice of the transfer and adaptation of productive models and the trajectories of innovation compromise and failure that can result Case studies cover in detail the Japanese transplant experience in North America and the global experience of hybrid production systems in Europe Latin America and Asia The book contributes to

theoretical discussions about the transfer adaptation or convergence of productive models In particular the authors argue that direct transplantation or imitation of these models is rarely feasible or even desirable Systems cannot be transferred without being significantly reshaped Instead the book focuses on the process of hybridization the complex interaction of productive models with national and societal effects Hybridization it is argued is inevitable But this should be seen not simply as a process of compromise and retreat but also as an important dynamic of innovation and learning This book is from the French based international research network GERPISA Groupe d'étude de recherche permanent sur l'industrie et les salaires de l'automobile See related titles below **Autocar & Motor** ,1994-07 **A Dictionary of Modern Design** Jonathan Woodham,2016-05-19 Over 950 entries From the Arts and Crafts Movement to Postmodernism Apple to Frank Lloyd Wright this fascinating dictionary covers the past 160 years of international design with accessible entries on branding graphics industrial design functionalism and fashion New entries on digital design and sustainable design bring the coverage up to date The dictionary's international focus takes in major movements key concepts design terminology and important design institutions museums and heritage sites The new edition reflects the growing global importance of design with coverage of India China the countries of the Pacific Rim Eastern Europe and East Asia and demonstrates how developments in the design of technology influence everyday life with new entries on fonts games developers such as Gunpei Yokoi of Nintendo Android Samsung and Blackberry and a fully revised entry on Apple The A Z entries are complemented by an extensive bibliography and a timeline *Business Rankings Annual Cumulative Index 2000* Gale Research International, Limited,Thomson Gale,1999-12
