MUNITORUM FIELD MANUAL

Welcome to the Munitorum Field Manual. This document contains the most up-to-date points values that should be used in your games, covering all the armies in Warhammer 40,000.

You can use this document to determine the points (and value of each unit in your army. Each army lists the increases in a unit's size that have different points costs. This may change with the addition of each individual model (eg. 1 model, 2 models, 3 models, etc.) so it can be presented with a lower and upper limit to a unit's starting strength (eg. you can fit 17 models within cost for 10 models). In the latter case, your table can assume a number of models to increase these limits, but you must still pay the maximum points cost for a unit that starts the game with more than its maximum number of models. You can have more than using points to create your army on page 10 of the Core Rules.

This document lists the points values for every unit that, at the time of publication, is supported by Warhammer 40,000 - including those available from Forge World - and those replace any points values published previously. It will be updated periodically to reflect the latest publications and to support game balance.
