Was There A Fifth Man Quintessential Recollections Wilfrid Basil Mann:

Was There a Fifth Man? Wilfrid Basil Mann, 2014-05-20 *Was There a Fifth Man Quintessential Recollections* presents the author's personal account of his professional life as an experimental physicist in the service at different times of each of the three countries that joined forces at the Quebec Conference in 1943 to produce the atom bomb. The author has been identified though always in a way which was just short of actionable with the so called Fifth Man of the long running British spy saga. For his sake and that of his family he felt duty bound to set the record straight before myth had time to trespass on history. Making extensive use of dated correspondence and publications he shows precisely where he was at the times that an individual called Basil was supposed to have been operating in collusion with Donald Maclean at the British Embassy in Washington. He claims that the misfit between Basil and himself is epitomized by the fact that when Basil was supposed to be entering the scene in Washington for an extensive sojourn the author was actually leaving Washington for the United Kingdom. NIST Special Publication, 1988 A Century of Excellence in Measurements, Standards, and Technology David R. Lide, 2001-10-30 Established by Congress in 1901 the National Bureau of Standards NBS now the National Institute of Standards and Technology NIST has a long and distinguished history as the custodian and disseminator of the United States standards of physical measurement. Having reached its centennial anniversary the NBS NIST reflects on and celebrates its first century with this book describing some of its seminal contributions to science and technology. Within these pages are 102 vignettes that describe some of the Institute's classic publications. Each vignette relates the context in which the publication appeared its impact on science technology and the general public and brief details about the lives and work of the authors. The groundbreaking works depicted include A breakthrough paper on laser cooling of atoms below the Doppler limit which led to the award of the 1997 Nobel Prize for Physics to William D Phillips. The official report on the development of the radio proximity fuse one of the most important new weapons of World War II. The 1932 paper reporting the discovery of deuterium in experiments that led to Harold Urey's 1934 Nobel Prize for Chemistry. A review of the development of the SEAC the first digital computer to employ stored programs and the first to process images in digital form. The first paper demonstrating that parity is not conserved in nuclear physics a result that shattered a fundamental concept of theoretical physics and led to a Nobel Prize for T D Lee and C Y Yang. Observation of Bose Einstein Condensation in a Dilute Atomic Vapor a 1995 paper that has already opened vast new areas of research. A landmark contribution to the field of protein crystallography by Wlodawer and coworkers on the use of joint x ray and neutron diffraction to determine the structure of proteins. **Bibliography On Soviet Intelligence And Security Services** Raymond G Rocca, 2019-03-08 This annotated bibliography is a valuable tool for research and teaching on Soviet intelligence and security services and its role in the country's domestic and international affairs. It categorizes nearly 500 books articles and government documents pertaining to Soviet intelligence. **Misdefending the Realm** Antony Percy, 2017 This is the story of how the Soviet Union successfully

infiltrated the UK government in the years leading up to WW2 and specifically when the USSR was an ally of Nazi Germany August 1939 June 1941 Historians have previously argued that this success was due to the existence of a Communist super mole within MI5 and that in the fight against Fascism multiple indulgences towards communists were an unavoidable strategy The reality was very different When a key Soviet defector warned of the deep insertion of agents within the corridors of power the Comintern were obliged by the Hitler Stalin pact to launch an aggressive counteroffensive in 1940 Britain s Security Service was persuaded that the threat from communist subversion was minimal When this most damaging espionage was detected MI5 s officers engaged in an extensive cover up to conceal their deficiencies Exploiting recently declassified material and a broad range of historical and biographical sources Antony Percy here reveals how the Soviet Union caught up so swiftly with Western expertise and weaponry and so removed a key Western advantage over its Communist adversary as the Cold War ensued

12 Seconds of Silence Jamie Holmes, 2020 The riveting story of the American scientists tinkerers and nerds who solved one of the biggest puzzles of World War II and developed one of the most powerful weapons of the war 12 Seconds of Silence is the remarkable lost story of how a rag tag group of American scientists overcame one of the toughest problems of World War II Shooting things out of the sky Working in a secretive organization known as Section T a team of physicists engineers and everyday Joes and Janes created one of the world s first smart weapons the proximity fuse The tiny gadget allowed an artillery shell to know when to explode to bring down an aircraft Against overwhelming odds and in a race against time mustering every scrap of resource ingenuity and insight the scientists of Section T would eventually save countless lives rescue the city of London from the onslaught of a Nazi superweapon and help bring about the Axis defeat A holy grail sought after by Allied and Axis powers alike the fuse ranks with the atomic bomb as one of the most revolutionary technologies of the Second World War Until now its tale was largely untold For fans of Erik Larson and Ben Macintyre set amidst the fog of espionage dueling spies and the dawn of an age when science would determine the fate of the world 12 Seconds of Silence is a tribute to the extraordinary wartime mobilization of American science and the ultimate can do story *The Australian Physicist* ,1983
