**50 Popular Beliefs That People Think Are True** Guy P. Harrison, 2012-01-03 What would it take to create a world in which fantasy is not confused for fact and public policy is based on objective reality asks Neil deGrasse Tyson science popularizer and author of Astrophysics for People in a Hurry I don t know for sure But a good place to start would be for everyone on earth to read this book Maybe you know someone who swears by the reliability of psychics or who is in regular contact with angels Or perhaps you re trying to find a nice way of dissuading someone from wasting money on a homeopathy cure Or you met someone at a party who insisted the Holocaust never happened or that no one ever walked on the moon How do you find a gently persuasive way of steering people away from unfounded beliefs bogus cures conspiracy theories and the like This down to earth entertaining exploration of commonly held extraordinary claims will help you set the record straight The author a veteran journalist has not only surveyed a vast body of literature but has also interviewed leading scientists explored the most haunted house in America frolicked in the inviting waters of the Bermuda Triangle and

even talked to a contrite Roswell alien He is not out simply to debunk unfounded beliefs Wherever possible he presents alternative scientific explanations which in most cases are even more fascinating than the wildest speculation For example stories about UFOs and alien abductions lack good evidence but science gives us plenty of reasons to keep exploring outer space for evidence that life exists elsewhere in the vast universe The proof for Bigfoot or the Loch Ness Monster may be nonexistent but scientists are regularly discovering new species some of which are truly stranger than fiction Stressing the excitement of scientific discovery and the legitimate mysteries and wonder inherent in reality this book invites readers to share the joys of rational thinking and the skeptical approach to evaluating our extraordinary world **The Improbable**

**Knowledge** Lewis Dartnell,2015-03-10 How would you go about rebuilding a technological society from scratch If our technological society collapsed tomorrow what would be the one book you would want to press into the hands of the postapocalyptic survivors What crucial knowledge would they need to survive in the immediate aftermath and to rebuild civilization as quickly as possible Human knowledge is collective distributed across the population It has built on itself for centuries becoming vast and increasingly specialized Most of us are ignorant about the fundamental principles of the civilization that supports us happily utilizing the latest or even the most basic technology without having the slightest idea of why it works or how it came to be If you had to go back to absolute basics like some sort of postcataclysmic Robinson Crusoe would you know how to re create an internal combustion engine put together a microscope get metals out of rock or even how to produce food for yourself Lewis Dartnell proposes that the key to preserving civilization in an apocalyptic scenario is to provide a quickstart guide adapted to cataclysmic circumstances The Knowledge describes many of the modern technologies we employ but first it explains the fundamentals upon which they are built Every piece of technology rests on an enormous support network of other technologies all interlinked and mutually dependent You can t hope to build a radio for example without understanding how to acquire the raw materials it requires as well as generate the electricity needed to run it But Dartnell doesn t just provide specific information for starting over he also reveals the greatest invention of them all the phenomenal knowledge generating machine that is the scientific method itself The Knowledge is a brilliantly original guide to the fundamentals of science and how it built our modern world **The Year's Best Science Fiction: Twenty-Sixth Annual**
