Apocalypse Catalin Negru,2023-01-20 Religion For thousands of years this thing has dictated which people should live and which people should die what shape our buildings should have or what colors our garments should contain what food people should eat or what words people should speak If religion is the opium of the masses then beliefs about the end of the world are like overdoses People touched by such beliefs no longer rely on a hidden personal and intimate god contemplated upon from the safe distance of the beating human heart They live with the promise of divine intervention at a grand scale on the current coordinates of space and time This can be an exceptional motivator and a game changer in terms of civil obedience both at an individual and collective level In the name of an immediate and palpable deity people can commit shocking cruelties However such belief can also account for some of the most exceptional social developments in human history

Chiang, 2018-08-02 The mass imprisonment of over 110 000 people of Japanese ancestry during World War II was one of the most egregious violations of civil liberties in United States history Removed from their homes on the

temperate Pacific Coast Japanese Americans spent the war years in desolate camps in the nation's interior. Photographers including Ansel Adams and Dorothea Lange visually captured these camps in images that depicted the environment as a source of both hope and hardship. And yet the literature on incarceration has most often focused on the legal and citizenship statuses of the incarcerated, their political struggles with the US government and their oral testimony. *Nature Behind Barbed Wire* shifts the focus to the environment. It explores how the landscape shaped the experiences of both Japanese Americans and federal officials who worked for the War Relocation Authority (WRA), the civilian agency that administered the camps. The complexities of the natural world both enhanced and constrained the WRA's power and provided Japanese Americans with opportunities to redefine the terms and conditions of their confinement. Even as the environment compounded their feelings of despair and outrage, the incarcerated also found that their agency in transforming and adapting to the natural world could help them survive and contest their incarceration. Japanese Americans and WRA officials negotiated the terms of confinement with each other and with a dynamic natural world. Ultimately, as Connie Chiang demonstrates, the Japanese American incarceration was fundamentally an environmental story.

Melting Pot or Civil War? Reihan Salam, 2018-09-25. Long before Covid-19 and the death of George Floyd rocked America, Reihan Salam predicted our current unrest and provided a blueprint for reuniting the country. The years to come may see a new populist revolt driven by the resentments of working-class Americans of color. For too long, liberals have suggested that only cruel racist or nativist bigots would want to restrict immigration. Anyone motivated by compassion and egalitarianism would choose open or nearly open borders, or so the argument goes. Now Reihan Salam, the son of Bangladeshi immigrants, turns this argument on its head. In this deeply researched but also deeply personal book, Salam shows why uncontrolled immigration is bad for everyone, including people like his family. Our current system has intensified the isolation of our native poor and risks ghettoizing the children of poor immigrants. It ignores the challenges posed by the declining demand for less skilled labor, even as it exacerbates ethnic inequality and deepens our political divides. If we continue on our current course in which immigration policy serves wealthy insiders who profit from cheap labor and cosmopolitan extremists attack the legitimacy of borders, the rise of a new ethnic underclass is inevitable. Even more so than now, class politics will be ethnic politics, and national unity will be impossible. Salam offers a solution: if we have the courage to break with the past and craft an immigration policy that serves our long-term national interests. Rejecting both militant multiculturalism and white identity politics, he argues that limiting total immigration and favoring skilled immigrants will combat rising inequality, balance diversity with assimilation, and foster a new nationalism that puts the interests of all Americans, native born and foreign born, first.
