Yearwood, 2012-05-23

International legal scholarship is concerned with the fragmentation of international law into specialised legal systems such as trade environment and human rights Fragmentation raises questions about the inter systemic interaction between the various specialised systems of international law This study conceptually focuses on the interaction between World Trade Organisation WTO law and external international law It introduces a legal theory of WTO law constrained openness as a way to understand that interaction The idea is that WTO law from its own internal point of view constructs its own law The effect is that external international law is not incorporated into WTO law wholesale but is re constructed as WTO law It follows that legal systems do not directly communicate with each other Therefore to influence WTO law an indirect strategic approach is required which recognises the functional nature of the differentiated systems of the fragmented international legal system *Basic Documents on International Trade Law* Chia-Jui Cheng, 2012-04-27

Regulating Migrant Integration in Europe Dáire McCormack-George, 2025-07-09 Migrants coming to and moving within Europe typically experience inadequate recognition of their professional qualifications and wrongful discrimination. This book describes and critically assesses international, European and EU laws and policies governing migrant integration in Europe with a particular focus on those concerning the recognition of migrants' skills. It argues that at least certain parts of EU law require clarification, restatement and even reform. The book formulates practical proposals to improve the governance of migrant integration in Europe, making it more coherent, effective and fair.

Health Technologies and International Intellectual Property Law Phoebe Li, 2013-12-17 The global transmission of infectious diseases has fuelled the need for a more developed legal framework in international public health to provide prompt and specific guidance during a large-scale emergency. This book develops a means for States to take advantage of the flexibilities of compulsory licensing in the Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS) which promotes access to medicines in a public health emergency. It presents the precautionary approach (PA) and the structure of risk analysis as a means to build a workable reading of TRIPS and to help States embody the flexibilities of intellectual property (IP). The work investigates the complementary roles of the World Health Organization (WHO) and the World Trade Organization (WTO) in order to promote the harmonisation of the precautionary approach in relation to the patenting of crucial pharmaceutical products. By bringing together international trade law and intellectual property law, Phoebe Li demonstrates how, through the use of risk analysis and the precautionary approach, States can still comply with their legal obligations in international law while exercising their sovereignty right in issuing a compulsory licence of a drug patent in an uncertain public health emergency. This book will be of great interest to students and academics of medical and healthcare law, intellectual property law, international trade law and human rights law.

The Internationalization of Government Procurement Regulation Aris Georgopoulos, Bernard Hoekman, Petros C. Mavroidis, 2017-02-16 As governments are major buyers of goods and services

foreign companies are keen to be able to participate in procurement opportunities on an equal footing with national firms. This has given rise to the inclusion of procurement disciplines in trade agreements and to internationally agreed good regulatory practices in this important policy area. The contributions to this book examine how the dynamic mix of bilateral, regional, plurilateral and international norms on government procurement is reflected in purchasing practices at the national level and whether these are leading to convergence in policies and approaches. The countries studied span both advanced high income economies and emerging economies. Some are members of the WTO procurement agreement, others are not. Most WTO members have decided not to commit to binding international disciplines on procurement in trade agreements. This book explores whether there has been nonetheless internationalization of good procurement practices and what current public purchasing processes suggest as regards the value added of signing on to binding rules of the game in this area. The approach taken in the volume is interdisciplinary. Contributors include economists, political scientists, legal scholars and practitioners with a solid understanding of both the extant international disciplines and national government procurement policies. Each chapter assesses the current state of play as regards legislation and procurement practices, the degree to which industrial policy considerations feature in the relevant regulatory frameworks, the existence and use of domestic dispute resolution and review procedures that allow firms to contest the behavior of procuring entities and the availability of data on procurement processes and outcomes.

Trade Agreements at the Crossroads Susy Frankel, Meredith Lewis, 2013-11-20. The book examines trade agreements in the context of the current world economic crisis and the uncompleted World Trade Organization (WTO) Doha Round of trade negotiations. With economies shrinking and protectionism on the rise, many fear a protracted global recession. This raises important questions as to what role trade agreements, multilateral, plurilateral and bilateral, should be playing in the current climate of uncertainty and how best to plan for a more stable economic future. Previous assumptions are now being questioned, making this an opportune time to critically examine the WTO free trade agreements, bilateral investment treaties and other international economic law instruments. Furthermore, participants in international agreements are concerned with emerging issues that have the potential to strengthen or weaken the global trading system, including matters of treaty interpretation, terms of new agreements and effects of existing provisions. This book provides a timely addition to the international economic law literature as its submissions have been prepared during a time of unusual uncertainty and economic change. Individuals interested in international economic law will seek scholarship that recognizes the current international economic climate. This book should be of interest to a wide range of academics and student researchers as well as policymakers and practitioners.

Sustainable Development Law Marie-Claire Cordonier Segger, Damilola S. Olawuyi, 2025-05-18. Hundreds of new bilateral, regional and global treaties have been negotiated in relation to the world's most pressing sustainability, development and justice challenges over the past two decades. The majority of these face significant implementation challenges. At the same time, disputes over human rights, environmental

protection and economic development are increasingly common Sustainable Development Law analyses these advances and challenges in the international law on sustainable development at the intersection between international social environmental and economic law It opens by examining the origins of the concept of sustainable development identifying and discussing the foundations of its legal aspects The principles of international law related to sustainable development are considered based on international instruments and disputes across international courts and tribunals Later chapters provide illustrative examples of legal instruments and regimes that address the 169 targets in relation to the 17 Global Sustainable Development Goals Finally the authors propose cutting edge research agendas and conclude by exploring the limits of sustainable development Sustainable Development Law is designed as a high level textbook examining the nature of law of sustainable development Chapters offer key takeaways and questions to consider for those studying the subject It also would be suitable for practising lawyers and policy makers who want to develop their understanding of the subject area *Uses and Misuses of International Economic Law* Moritz J. K. Blenk, 2022-09-12 Standardization is a classic form of rulemaking Nonetheless it is notoriously diffuse and gives rise to questions and debate in particular over the standards normativity legitimacy and nature whether public or private national or international Moritz J K Blenk applies a policy orientated approach to international law to comparatively analyze the role of private rulemaking within the context of international economic integration in the World Trade Organization and the European Union He thereby aims to elucidate the opaque phenomenon of private standardization from a legal perspective and more profoundly shed new light on economic integration

European Yearbook of International Economic Law 2011 Christoph Herrmann, Jörg Philipp Terhechte, 2011-01-12 Part one of Vol 2 2011 of the European Yearbook of International Economic Law addresses two major topics of current academic debate and public interest firstly it focuses on the State and the Global Economy secondly on Climate Change and International Economic Law Part two contains treatises of recent regional integration developments taking place in the major regions of the world Part three covers the legal and political developments in the major international organizations and fora dealing with international economic policy making Part four contains book reviews of recent works in the field of International Economic Law
