World War II

The major causes of the World War II are yet to be determined, however, it remains to be the largest war in the history of the world that was fought on a global scale. The war began in 1939 and was fought until 1945. Involving more than 100 million members of the military from more than 30 nations, the war began to escalate gradually following its inception as a testing of powers through smaller conflicts which eventually blew into a full war. The main war occurred after the separation of the key militaries into two opposing armies. The members of various world militaries were thus exposed to the world superpowers at the time.

The Work of the Future David H. Autor, David A. Mindell, Elisabeth Reynolds, 2023-10-03 Why the United States lags behind other industrialized countries in sharing the benefits of innovation with workers and how we can remedy the problem The United States has too many low quality low wage jobs Every country has its share but those in the United States are especially poorly paid and often without benefits Meanwhile overall productivity increases steadily and new technology has transformed large parts of the economy enhancing the skills and paychecks of higher paid knowledge workers What's wrong with this picture Why have so many workers benefited so little from decades of growth The Work of the Future shows that technology is neither the problem nor the solution We can build better jobs if we create institutions that leverage technological innovation and also support workers through long cycles of technological transformation Building on findings from the multiyear MIT Task Force on the Work of the Future the book argues that we must foster institutional innovations

Locus of Authority William G. Bowen, Eugene M. Tobin, 2017-05-30 Locus of Authority argues that every issue facing today s colleges and universities from stagnant degree completion rates to worrisome cost increases is exacerbated by a century old system of governance that desperately requires change While prior studies have focused on boards of trustees and presidents few have looked at the place of faculty within the governance system Specifically addressing faculty roles in this structure William G Bowen and Eugene M Tobin ask do higher education institutions have what it takes to reform effectively from within Bowen and Tobin use case studies of four very different institutions the University of California Princeton University Macalester College and the City University of New York to demonstrate that college and university governance has capably adjusted to the necessities of the moment and that governance norms and policies should be assessed in the context of historical events The authors examine how faculty roles have evolved since colonial days to drive change but also to stand in the way of it Bowen and Tobin make the case that successful reform depends on the artful consideration of technological financial and cultural developments such as the explosion in online learning Stressing that they do not want to diminish faculty roles but to facilitate their most useful contributions Bowen and Tobin explore whether departments remain the best ways through which to organize decision making and if the concepts of academic freedom and shared governance need to be sharpened and redefined Locus of Authority shows that the consequences of not addressing college and university

A short research paper on Kurt Vonnegut's "Slaughterhouse Five" David Federhen, 2003-04-26 Seminar paper from the year 2002 in the subject American Studies Literature grade A deutsch 1 International University in Germany Bruchsal Department of Sciences and Liberal Arts language English abstract

Introduction Kurt Vonnegut Jr is considered one of the greatest American authors ever He wrote about 30 novels an uncounted number of short stories and a few essays and plays His most successful novel Slaughterhouse Five or The Childrens Crusade a Duty Dance with Death was his sixth book and published in 1969 This research paper will focus on the connection between Billy Pilgrim the main character of Slaughterhouse Five and the life of Kurt Vonnegut Furthermore it will make use of this connection in order to suggest why Kurt Vonnegut wrote this book Pilgrim who is an American World War II veteran and survived the allied air raid on Dresden in early 1945 strikes the reader as a very eccentric person He believes that he has come unstuck in time Vonnegut 1991 p 23 and time travels to his childhood to his wedding to the Battle of the Bulge and to the air raid But not only that he has lost control over the temporal aspects of his life he furthermore believes that he has been kidnapped by aliens from the planet Tralfamadore and taken to their world as an exhibit in a terrarium In order to point out the close relationship between the author and the main character I will subdivide this paper into several sections shortly giving information about the author s biography and providing a quick summary of Slaughterhouse Five This information has to be considered and related in order to understand Vonnegut s motivation for writing this novel It is vital to realize that Pilgrim is Vonnegut and that whatever Pilgrim feels is what Vonnegut experienced in his life
