The Human Right to Water: Justice . . . or Sham? Evelyne Fiechter-Widemann, 2017-05-05 Water is a matter of life and death Advanced technology and engineering enable humans to gain better access to it Nonetheless the conditions and effort required to reach this goal remain colossal in many countries Building a lasting infrastructure for adequate treatment before and after use is costly Therefore the author believes that a radical change of thinking among people around the world from the domestic to the large scale users becomes a priority Even if the United Nations entitles all people to justice for water more responsible and ethical use of it by all interested parties is more important than the spreading of promises which in practice may turn out to be a sham Only a better understanding that access to water rests on the efforts of everyone without exception will reduce overuse waste and pollution of the indispensable resource This volume while written from a theological philosophical and legal perspective focusing on John Calvin John Rawls and Paul Ricoeur demonstrates that water cannot be merely understood as a human right but also has to be dealt with from an economic point of view as well as under the authority of the Golden Rule **Meeting the Challenge of Human Resource Management** Vernon D.
