Collins,Alexander W. Wiseman,2012-03-06 Following the development of a Concept Note for the World Bank Education Strategy 2020 the World Bank engaged in a series of activities to garner feedback about the strategy In early 2011 a revised strategy was published Learning for All Investing in People s Knowledge and Skills to Promote Development This title deals with this topic *To Reform the World* Guy Fiti Sinclair,2017-03-02 This book explores how international organizations IOs have expanded their powers over time without formally amending their founding treaties IOs intervene in military financial economic political social and cultural affairs and increasingly take on

roles not explicitly assigned to them by law Sinclair contends that this mission creep has allowed IOs to intervene internationally in a way that has allowed them to recast institutions within and interactions among states societies and peoples on a broadly Western liberal model Adopting a historical and interdisciplinary socio legal approach Sinclair supports this claim through detailed investigations of historical episodes involving three very different organizations the International Labour Organization in the interwar period the United Nations in the two decades following the Second World War and the World Bank from the 1950s through to the 1990s The book draws on a wide range of original institutional and archival materials bringing to light little known aspects of each organization s activities identifying continuities in the ideas and practices of international governance across the twentieth century and speaking to a range of pressing theoretical questions in present day international law and international relations

Culture's Consequences Geert Hofstede, 2001-04-20 An important sophisticated and complex monograph Both the theoretical analysis and the empirical findings constitute major contributions to cross cultural value analysis and the cross cultural study of work motivations and organizational dynamics This book is also a valuable resource for anyone interested in a historical or anthropological approach to cross cultural comparisons PERSONNEL PSYCHOLOGY PERSONNEL PSYCHOLOGY The Second Edition of this classic work first published in 1981 and an international best seller explores the differences in thinking and social action that exist among members of more than 50 modern nations Geert Hofstede argues that people carry mental programs which are developed in the family in early childhood and reinforced in schools and organizations and that these programs contain components of national culture They are expressed most clearly in the different values that predominate among people from different countries Geert Hofstede has completely rewritten revised and updated Culture s Consequences for the twenty first century he has broadened the book s cross disciplinary appeal expanded the coverage of countries examined from 40 to more than 50 reformulated his arguments and a large amount of new literature has been included The book is structured around five major dimensions power distance uncertainty avoidance individualism versus collectivism masculinity versus femininity and long term versus short term orientation

The Global Governance Reader Rorden Wilkinson, 2005 This Reader provides students and scholars with a comprehensive and considered collection of articles covering the most theoretical and empirical contributions by leading specialists in the field

Transition and Institutions Giovanni Andrea Cornia, Vladimir Mikhailovich Popov, 2001 This book is the first comprehensive assessment of the mortality crisis which has affected most economies in transition but which has remained so far largely unexplained It reconciles long term and short term explanations of the crisis and makes use of special micro data sets never used before By providing a rigorous multidisciplinary analysis of this upsurge in mortality rates the book hopes to contribute to the launch of vigorous policies to tackle this societal problem

Africa and Asia in Comparative Economic Perspective P. Lawrence, C. Thirtle, 2001-05-14 This invaluable collection compares the relatively unsuccessful economic development of Sub-Saharan Africa with that of the successful Asian economies especially the Asian tigers It covers three main areas of comparison the lessons for Africa from the Asian experience secondly the comparisons of various aspects of economic development in Africa and Asia and finally convergence how far the laggard economies are catching up with or diverging away from each other

Deepening Democracy Francis Adams, 2003-05-30 Adams surveys the impact of transnational organizations and NGOs on Latin American politics since 1990 The transition from military to civilian rule in Latin American countries has benefited local progressive forces but resilient remnants favoring the past's authoritarian politics have compelled organizations like the UN IMF OAS and World Bank to engage in various campaigns to deepen democratic institutions and norms Adams argues that to understand current political transformations in the region one must consider the existing role of external organizations Latin America is offered as a prime example of the increased influence transnational authorities have over political decisions that had long been the exclusive prerogative of national governments Beginning with the Latin American experience Adams reviews the contemporary character of power and politics in the area outlining how democratic transitions have been limited UN human rights and reform initiatives are considered Adams scrutinizes the work of the World Bank the IMF and the Inter American Development Bank to modernize public administration strengthen political institutions enhance transparency and accountability and fortify civil society He also examines the work and impact and the Organization of American States and various global citizens groups

Governance and Public Sector Reform in Asia Anthony Cheung, Ian Scott, 2003-08-29 Based on new field research this book assesses the current state of governance and public sector reforms in eleven Asian countries and jurisdictions especially in the wake of the recent regional financial crisis that seriously affected some of them It analyses reform efforts comparatively against a backdrop of governance problems and seeks to establish whether these efforts represent a substantive shift in attitudes towards reform or whether they serve simply to reinforce existing practices The authors explore a number of important themes that are central to governance and public sector reform issues These include the role of the state the success or failure of organizational reforms corruption the applicability of the new public management model in the Asian context and the governance values and reform models promoted by regional and international agencies

The Global

Social Policy Reader Yeates, Nicola, Holden, Chris, 2009-06-19 This text collects together a comprehensive range of key papers by international leaders in the field from a wide range of sources that explain the concepts actors and processes that constitute global social policy **Changing Administration, Changing Society** Peter Herrmann, Sabine Herrenbrueck, 2007 Welfare is a current global issue challenging the lives of many Investigations are constantly being made to find answers in search of the most proficient social model This book presents the usefulness of an enhanced model for welfare regime analysis and shows the localisation of social professional orientations This includes social quality social professions traditions public services globalisation child protection retirement plans and other social services African Reckoning Francis M. Deng, Terrence Lyons, 2001-06-07 This book investigates how changing norms of sovereignty may promote better governance in Africa It begins by tracing the evolution of the concept of sovereignty and how in the post Cold War era sovereignty has been redefined to emphasize the responsibility of the state to manage conflict and protect human rights African Reckoning includes assessments of how state actors in Africa measure up to the norms inherent in the notion of sovereignty as responsibility The book also examines the question of accountability at the regional and international levels The authors conclude that since the power of oppressed people to hold their governments accountable is very limited the international community has a responsibility to provide victims of internal conflict and gross violations of human rights with essential protection and assistance Accordingly the book expounds on the normative principles of responsible sovereignty international mechanisms and strategies for their enforcement and empirical evidence about the performance of governments as measured by the requirements of responsible sovereignty Contributors include Richard Falk Abdullahi Ahmed An Na im James Rosenau Goran Hyden Michael Chege and John D Steinbruner **Health Sector Reforms in Orissa** Subrata Kundu, 2010-07-12 In analysing the phenomenon of health sector reforms this book proposes a new conceptual framework of analysis and ethnography as a methodological tool which could be used effectively in various country contexts compared to what the existing theoretical frameworks do Thus apart from generating new knowledge in health sector this study has significance for policy makers across the world When the states themselves accept the fact that increasing private participation in health care in the form of health sector reforms is happening because of deliberate state policy they will be better positioned to take decisions which ensure effective private sector regulation and universal access to quality health care within a democratic or participatory framework of governance Increasing privatisation of health care has also led toward citizens losing their democratic spaces with regard to decisions on universal access to quality health care This has wider implications not only for improved health status in general but also about how we live in a modern society with our values of liberty equality and justice intact The book would be a useful guide for policy makers researchers students and layman across the world **The Institutional Economics of Water** R. Maria Saleth, Ariel Dinar, 2004-01-01 The literature review is one of the best and most comprehensive that I have seen Daniel W Bromley University of Wisconsin US

This is an impressive book It will be used by diverse audiences For scholars interested in the evolution of institutional theory they will assign students primarily to the first three chapters For scholars in resource economics they will have them read the last part of the book The strength of the book however is bringing both these approaches together within one set of pages Elinor Ostrom Indiana University US This outstanding new book provides the most detailed and comprehensive evaluation of water reform and water sector performance from the perspectives of institutional economics and political economy

Social Justice, Global Dynamics Ayelet Banai, Miriam Ronzoni, Christian Schemmel, 2011-04-06 Addresses fundamental problems in international justice by identifying problematic practices and trends in the in the global order and offering normative views on policies and institutions including international health policies the World Bank taxation policies and the World Trade Organization

Global Geopolitical Power and African Political and Economic Institutions John James Quinn, 2015-12-30 Global Geopolitical Power and African Political and Economic Institutions When Elephants Fight describes the emergence and nature of the prevailing African political and economic institutions in two periods In the first most countries adopted political and economic institutions that funneled significant levels of political and economic power to the political elites usually through one or no party military political systems inward oriented development policies and or state led and often state owned industrialization In the second period most countries adopted institutions that diluted the overarching political and economic power of ruling elites through the adoption of de jure multiparty electoral systems more outward oriented trade policies and the privatization of many state owned or controlled sectors though significant political and economic power remains in their hands The choices made in each period were consistent with prevailing ideas on governance and development the self interests of political elites and the perceived availability of support or autonomy vis vis domestic regional and international sources of power at the time This book illustrates how these two region wide shifts in prevailing political and economic institutions and practices of Africa can be linked to two prior global geopolitical realignments the end of WWII with the ensuing American and Soviet led bipolar system and the end of the Cold War with American primacy Each period featured changed or newly empowered international and regional leaders with competing national priorities within new intellectual and geopolitical climates altering the opportunities and constraints for African leaders in instituting or maintaining particular political and economic institutions or practices The economic and political institutions of Africa that emerged did so as a result of a complex mix of contending domestic regional and international forces material and intellectual all which were themselves greatly transformed in the wake of these two global geopolitical realignments

Geographies of Developing Areas Glyn Williams, Paula Meth, Katie Willis, 2014-03-21 Geographies of Developing Areas is a thought provoking and accessible introductory text presenting a fresh view of the Global South that challenges students pre conceptions and promotes lively debate Rather than presenting the Global South as a set of problems from rapid urbanization to poverty this book focuses on the diversity of life in the South and looks at the role the South plays

in shaping and responding to current global change The core contents of the book integrate traditional concerns of development geographers such as economic development and social inequality with aspects of the global South that are usually given less attention such as cultural identity and political conflict This edition has been fully updated to reflect recent changes in the field and highlight issues of security risk and violence environmental sustainability and climate change and the impact of ICT on patterns of North South and South South exchange It also challenges students to think about how space is important in both the directions and the outcomes of change in the Global South emphasizing the inherently spatial nature of political economic and socio cultural processes Students are introduced to the Global South via contemporary debates in development and current research in cultural economic and political geographies of developing areas The textbook consider how images of the so called Third World are powerful but problematic It explores the economic political and cultural processes shaping the South at the global scale and the impact that these have on people s lives and identities Finally the text considers the possibilities and limitations of different development strategies The main arguments of the book are richly illustrated through case study material drawn from across the Global South as well as full colour figures and photos Students are supported throughout with clear examples explanations of key terms ideas and debates and introductions to the wider literature and relevant websites in the field The pedagogical features of the book have been further developed through discussion questions and activities that provide focused tasks for students research including investigation based around the book s case studies and in depth exploration of debates and concepts it introduces
