SUB-DIMENSIONAL ECONOMY YAOZU SONG,YUCHEN SU,2021-08-04 The aim of this book is to apply the basic principles of economics and political science to construct a sub dimensional economic model in online games so that a healthy and sustainable new human economy can be developed in online games Ultimately it will provide countless new jobs for humanity and solve the problem of unemployment caused by the imminent explosion of artificial intelligence technology No company in human society has yet developed an online game with the attributes of a sub dimensional economy and most humans only consider online games to be entertainment However the potential of a space that can be freely constructed in accordance with human ideas and in which humans can interact freely should be more than entertainment If someone were to create an online game with a sub dimensional economy based on the construction of this book they would undoubtedly become the richest man in the world If someone were to refine or expand on the thesis in this book a Nobel Prize would beckon *The Ecology of Games* Katie Salen Tekinbas,2007-11-30 An exploration of games as systems in which young people participate as gamers producers and learners In the many studies of games and young people s use of them little has been written about an overall ecology of gaming game design and play mapping the ways that all the various elements from coding to social practices to aesthetics coexist in the game world This volume looks at games as systems in which young

users participate as gamers producers and learners The Ecology of Games edited by Rules of Play author Katie Salen aims to expand upon and add nuance to the debate over the value of games which so far has been vociferous but overly polemical and surprisingly shallow Game play is credited with fostering new forms of social organization and new ways of thinking and interacting the contributors work to situate this within a dynamic media ecology that has the participatory nature of gaming at its core They look at the ways in which youth are empowered through their participation in the creation uptake and revision of games emergent gaming literacies including modding world building and learning how to navigate a complex system and how games act as points of departure for other forms of knowledge literacy and social organization Contributors Ian Bogost Anna Everett James Paul Gee Mizuko Ito Barry Joseph Laurie McCarthy Jane McGonigal Cory Ondrejka Amit Pitaru Tom Satwicz Kurt Squire Reed Stevens S Craig Watkins

Fatal Pauses Stuart C. Yudofsky, 2015-04-01 People can become stuck in many ways and for a wide variety of reasons explains the author of Fatal Pauses that rare book that both clinicians and general readers can benefit from and enjoy Novelistic in its depictions of composite patients but clear eyed in its analysis the book offers a 3 D method of addressing stuck ness which is defined as not stopping something that is bad for us or not starting and staying with something that is good for us The process of discovering why one is stuck deciding to become unstuck and then asserting the discipline required to do so is brought to vivid life by one of the most respected psychiatrists of our day The book s structure is logical and engaging The Am I Stuck Scale can be self administered by general readers or administered by clinicians to their patients This first chapter sets the stage for what follows The 3 D method of getting unstuck is presented in a systematic easy to comprehend manner that begins with a brief overview and proceeds to more detailed instructions and insights Riveting case examples make up the heart of the book They are not mere summaries but consist of thorough and detailed clinical descriptions that provide context in addition to extensive dialogue and analysis Several of these cases are divided into multiple chapters providing a comprehensive clinical picture to help both mental health professionals and lay readers increase their understanding of being stuck A range of categories or stuck ness is addressed including being trapped by career choices limited by obesity paralyzed by an unsatisfying marriage incapacitated by addiction and imprisoned by the need to please Of special note is the case example of a young man whose interpersonal relationships have gradually but progressively become reduced to computer based encounters The author s examination of this individual s fixation on video games and virtual realities and his escape from this cyberprison through treatment is both timely and compelling Finally the author provides an evolutionary and neurobiological overview of how we become stuck which helps the reader grasp the underpinnings of this behavior and learn how to become unstuck Written in a warm and disarming style Fatal Pauses will find a home in clinicians libraries waiting rooms and on family room bookshelves
