## World War II

World War II was a big war that happened a long time ago. It started in 1939 and ended in 1945. It was fought between two groups of countries. One group was called the Allies, which included countries like the United States, United Kingdom, and Soviet Union. The other group was called the Axis, which included countries like Germany, Italy, and Japan.

The war started when Germany invaded Poland in 1939. This made the Allies angry, so they declared war on Germany. The war spread to many countries around the world, including France, Russia, and China.

During World War II, there were many battles fought on land, in the air, and at sea. Soldiers fought bravely to protect their countries and their families. Many people lost their lives in the fighting, and many more were injured.

One of the most famous events of World War II was the attack on Pearl Harbor. In 1941, Japan attacked the United States naval base in Hawaii, killing many people and destroying many ships. This event led the United States to join the war on the side of the Allies.

Another important event of World War II was the invasion of Normandy, also known as D-Day. In 1944, the Allies landed on the beaches of France and fought against the German army. This battle was a turning point in the war, and it eventually led to the defeat of the Axis powers.

In 1945, the war finally came to an end. The Allied forces were able to defeat the Axis powers, and the world was finally at peace again. Many countries were left devastated by the war, and it took a long time for them to recover.

World War II was a terrible time in history, but it also showed the bravery and strength of people around the world. It is important to remember the lessons of the war so that we can prevent something like this from happening again.

Film Style and the World War II Combat Genre Stuart Bender,2014-08-11 Film Style and the World War II Combat Genre is a detailed examination of the stylistic means by which filmmakers depict stories of combat The work furthers contemporary discussions by analyzing a range of World War II combat films to a degree of detail which has previously escaped critical attention This substantial examination of cinematography sound editing and acting in a range of movies including Saving Private Ryan Windtalkers Bataan and Objective Burma demonstrates the importance of close attention to the textual construction of these films specifically as well as cinematic texts more generally The work advances the original analytic descriptions of controlled spontaneity and reported realism as theoretical concepts which explain why viewers regard certain stylistic techniques as realistic This notion of realism is then further understood through reference to a body of research in cognitive psychology to argue that the density of audio visual information in contemporary combat films is a significant factor in creating a sense of realism
