They are actively involved in all stages of agrifood value chains as farmers producers processors and consumers Yet structural barriers limit their access to economic opportunities thereby restricting also agrifood value chain sustainable and inclusive development This publication employs FAO s gender responsive value chain approach to analyze three case studies from Elbasan Puka and Leskovik It highlights the opportunities for strengthening the role of women producers and processors in value chains and identifies key barriers that hinder women s full participation Agribusiness incubators are highlighted in the report as innovative solutions designed to meet the specific needs of rural women and promote their economic empowerment. These incubators could play a crucial role in helping women overcome barriers in the agrifood sector fostering their participation and unlocking new opportunities for the development of specific agrifood value chains Contra Keynes and Cambridge F. A. Hayek, 2012-09-21 In 1931 when the young F A Hayek challenged the economic theories of John Maynard Keynes sixteen years his senior and one of the world's leading economists he sparked a spirited debate that would influence economic policy in democratic countries for decades Their extensive exchange lasted until Keynes s death in 1946 and is reprinted in its entirety in this latest volume of The Collected Works of F A Hayek When the journal Economica published a review of Keynes s Treatise on Money by Hayek in 1931 Keynes s response consisted principlally of an attack on Hayek s own work on monetary theory Prices and Production Conducted almost entirely in economics journals the battle that followed revealed two very different responses to a world in economic crisis Keynes sought a revision of the liberal political order arguing for greater government intervention in the hope of protecting against the painful fluctuations of the business cycle Hayek instead warned that state involvement would cause irreparable damage to the economy This volume begins with Hayek s 1963 reminiscence The Economics of the 1930s as Seen from London which has never been published before The articles letters and reviews from journals published in the 1930s are followed by Hayek's later reflections on Keynes's work and

influence The Introduction by Bruce Caldwell puts the debate in context providing detailed information about the economists in Keynes's circle at Cambridge their role in the acceptance of his ideas and the ways in which theory affected policy during the interwar period Caldwell calls the debate between Hayek and Keynes a battle for the minds of the rising generation of British trained economists There is no doubt that Keynes won the battle during his lifetime Now when many of Hayek's ideas have been vindicated by the collapse of collectivist economies and the revival of the free market around the world this book clarifies Hayek's work on monetary theory formed in heated opposition to Keynes and illuminates his efforts to fight protectionism in an age of economic crisis F A Hayek 1899 1992 recipient of the Medal of Freedom in 1991 and co winner of the Nobel Memorial Prize in Economics in 1974 was a pioneer in monetary theory and the principal proponent of classical liberal thought in the twentieth century He taught at the University of London the University of Chicago and the University of Freiburg Background Notes on Sustainable, Productive and Resilient Agro-Food Systems Value Chains, Human Capital, and the 2030 Agenda OECD, Food and Agriculture Organization of the United Nations, 2019-07-23 This report prepared by FAO and the OECD with inputs from ERIA IFPRI IFAD and WTO has been submitted to the G20 Presidency of Japan in response to the Presidency's request for background notes on Sustainable Productive and Resilient Agro Food Systems value chains human capital and the 2030 Agenda *Up-skilling human capital for value-chain competitiveness in Uruguay* Freeman, K., Dias Pereira, L., Bullor, L., Perego, V.M.E., Escudero, D., Voss, F., Pessoa, T., 2021-10-25 Investing in farmers or agriculture human capital is crucial to addressing challenges in our global agri food systems from sustainably feeding the world's growing population with food that is safe healthy and nutritious to finding innovative solutions for more resilient and climate smart agriculture Up skilling human capital for value chain competitiveness in Uruguay was developed by the FAO Investment Centre and the World Bank with the objective to identify ways to upskill human capital and make Uruguayan agricultural value chains more competitive This publication looks at opportunities to increase key value chain efficiency and at the skills that are required to seize such opportunities It identifies ways to develop human capital through training agricultural professionals including researchers agronomists and technicians to lead the next generation of technology and innovation driven agribusinesses It suggests options for fostering a process of continuous development and upskilling in the agricultural sector in Uruguay This publication is part of the Country Investment Highlights series under the FAO Investment Shea value chain as key pro-poor carbon-fixing engine in West Centre s Knowledge for Investment K4I programme Africa Food and Agriculture Organization of the United Nations, Global Shea Alliance, 2020-02-07 As part of its Sustainability Program the Global Shea Alliance GSA in partnership with the Food and Agriculture Organisation of the United Nations FAO Regional Office for Africa conducted this multi impact appraisal of the shea value chain in 8 West African countries that account for 99% of shea exports The study uses the EX ACT Value Chain tool EX ACT VC developed in 2016 by the FAO to assess the value chain s contribution to climate mitigation climate resilience and socio economic impact At present the shea
