Models for Immigrant Students Keengwe, Jared, Onchwari, Grace, 2019-06-14 Standardized tests have been selected as a key assessment factor in expanding the academic achievement of the national student population. However, these tests position immigrant students at the risk of academic failure, leading education experts to search for new strategies and teaching models. *The Handbook of Research on Assessment Practices and Pedagogical Models for Immigrant Students* is a critical research publication that focuses on research-based pedagogical practices for teaching immigrant students. Edited by a prominent IGI Global editor, this book examines the latest professional development models and assessment practices of English learners (ELs). Covering essential topics such as second language acquisition (SLA), classroom management, teacher education, refugee resettlement programs, and more, this publication is a valuable resource for academicians, professionals, researchers, administrators, faculty, and classroom teachers as the social and academic needs of English language learners continue to present a challenge for many schools and teachers.

Meeting the Challenges to Measurement in an Era of Accountability Henry Braun, 2016-01-29 Under pressure and support from the federal government, states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves. The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests, such as in mathematics or English language arts, with a focus on grades 4-8. Teachers in these subject areas, however, constitute less than thirty percent of the teacher workforce in a district. Comparatively little has been written about the measurement of achievement in the other grades and subjects. This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas, with particular attention to their use in the evaluation of teachers and schools in all. It addresses traditional end-of-course tests as well as alternative measures such as portfolios, exhibitions, and student learning objectives. In each case, issues related to design and development, psychometric considerations, and validity challenges are covered from both a generic and a content-specific perspective. The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research-based applications of educational measurement and assessment. Edited by leading experts, these books are comprehensive and practical resources on the latest developments in the field. Toward a Livable Life Mark R. Rank, 2020 *Toward a Livable Life* explores many of today's most critical issues facing both the United States and the profession of social work, i.e., poverty, inequality, disparities in health, discrimination, and several other areas. The volume enlists the insights of leading social work scholars in order to assess the causes behind these problems and identify innovative solutions.

The Courts, Social Science, and School Desegregation Betsy Levin, 2018-02-06 This book surveys the legal issues confronting courts as they decide school desegregation cases and the extent to which social science research has been brought to bear on those issues.
