Chaudhry, 2012-08-10 Medical Licensing and Discipline in America traces the evolution of the U.S. medical licensing system from its historical antecedents in the 18th and 19th century to its modern structure David A. Johnson and Humayun J. postmetaphysical outlook Drawing on the philosophical perspectives of Whitehead and Hartshorne and the theologies of Ogden and Gamwell he concludes that a process metaphysical theology offers the most promising path for theology to regain a vital public voice in the world of the twenty first century

**A City without Care** Kevin McQueeney, 2023-03-16 New Orleans is a city that is rich in culture music and history It has also long been a site of some of the most intense racially based medical inequities in the United States Kevin McQueeney traces that inequity from the city s founding in the early eighteenth century through three centuries to the present He argues that racist health disparities emerged as a key component of the city s slave based economy and quickly became institutionalized with the end of Reconstruction and the rise of Jim Crow McQueeney also shows that despite legislation and court victories in the civil rights era a segregated health care system still exists today In addition to charting this history of neglect McQueeney also suggests pathways to fix the deeply entrenched inequities taking inspiration from the long civil rights framework and reconstructing the fight for improved health and access to care that started long before the boycotts sit ins and marches of the 1950s and 1960s In telling the history of how New Orleans has treated its Black citizens in its hospitals McQueeney uncovers the broader story of how urban centers across the country have ignored Black Americans and their health needs for the entire history of the nation
