

SCIPIO PUT HIS HAND ON FABIUS' SHOULDER.

'UNTIL WE MEET AGAIN, MY FRIEND.

IN THIS WORLD OR THE NEXT.'

Fabius tried to remember what the old centurion had told him about battle: You will see nothing but the tunnel in front of you, and that tunnel will become your world. Close that tunnel of the enemy, and you may survive. Try to see what goes on outside the tunnel, take your eye off those who have their eyes on you, and you will die.

The Sword of Attila David Gibbins, 2015-01-27 AD 439 The Roman Empire is on the brink of collapse. With terrifying speed a Vandal army has swept through the Roman provinces of Spain and North Africa, conquering Carthage and threatening Roman control of the Mediterranean. But a far greater threat lies to the east: a barbarian force born in the harsh steppelands of central Asia, warriors of unparalleled savagery who will sweep all before them in their thirst for conquest: the army of Attila the Hun. For a small group of Roman soldiers and a mysterious British monk, the only defense is to rise above the corruption and weakness of the Roman emperors and hark back to the glory days of the army centuries before to find strength in history. Led by Flavius, a young tribune, and his trusty centurion Macrobius, they fight a last ditch battle against the Vandals in North Africa before falling back to Rome where they regroup and prepare for the onslaught to come. Flavius learns that the British monk who had fled with them from Carthage is more than he seems, and he is drawn into a shady world of intelligence and intrigue under the aegis of Flavius' uncle Aetius, commander in chief of the Roman armies in the west. The man who alone has the power to rally Rome and her allies and save the western empire from annihilation, Aetius is desperate to buy time until his army is strong enough to confront the Huns on the field of battle, and meanwhile will do anything to undermine their strength. Together they devise a plan of astonishing audacity that will take Flavius and Macrobius across the frontier and far up the river Danube to the heart of darkness itself, to the stronghold of the most feared warrior emperor the world has ever known, and into alliance with the emperor's daughter, a warrior princess who has sworn vengeance against her father for the death of her mother. In the showdown to come in the greatest battle the Romans have ever fought, victory will go to those who can hold high the most potent symbol of war ever wrought by man: the sacred sword of Attila.

Organizations, Individualism and Economic Theory Maria Brouwer, 2012-08-21 Most economic theory is based on the assumption that economies grow in a linear fashion. Recessions, depressions, and financial crises are explained by policy mistakes. However, economic development has historically been uneven, and this state of affairs continues today. This book argues that twentieth-century economic theory has marginalized individualism and organizational variety and puts forward the case for a pluralist approach. This book represents a unique synthesis of business theory and economic theory which pinpoints the problems with many current mainstream theories and sets out new agendas for research. Here Maria Brouwer argues that market competition is not about

adapting to changes from outside but is driven by human motivation and goal directed behavior This gives managerial skills which do not traditionally have a significant place in mainstream economic theory a key role It also highlights the need for organizations that have a motivational culture and appreciate human capital This differs from the traditional view of the firm as a production function dictated by technology Brower argues that organizations should be depicted as voluntary associations of people that pursue goals of their own while firms compete on markets where relative performance determines their fate This argument builds on older theories of innovation and market competition that live on in business school curricula and paints a picture of an economy directed by individuals and firms This signals a bold departure from standard economic thinking

War Gwynne Dyer, 2005 A new and revised edition of Dyer's classic book widely regarded as one of the most compelling analyses of the history of armed conflict War is part of our history but it is not in at all the same sense part of our prehistory It is one of the innovations that occurred between nine and eleven thousand years ago when the first civilized societies were coming into being What has been invented can be changed war is not in our genes With this provocative statement Gwynne Dyer launches his brilliant discussion of the history and nature of war He traces the growth of organized warfare through history showing conclusively that the basic tenet has remained unchanged war is an act of mass violence applied against an enemy so that he will do what you want him to do The only real change has been technological permitting us to make war on a mass scale At the height of the Cold War just such a global conflagration seemed almost inevitable But the collapse of the Iron Curtain and the ensuing political changes have forced a re examination of the accepted fundamentals of history Will open access to the channels of mass communication create enough shared values that we can move beyond mass warfare Is the threat of terrorism a red herring designed to preserve the military status quo Are our traditional military and administrative hierarchical structures still relevant Now more than ever in our post September 11 world we need Gwynne Dyer's expertise to understand the greatest and most human drama the act of war Excerpt from *War* The Siamese twins army and state have never been separated since they were born some eight or nine thousand years ago and most of the time the state is the stronger of the twins Armies exist to serve the interests of the state that owns them and their legitimacy comes solely from the fact that they belong to states similar groups of armed men if self employed are generally known as rebels or bandits This is the context in which warfare as opposed to casual and illegitimate violence must be seen it is something states do and have always done because they believe it serves their interest From the Hardcover edition

Rome Neil Faulkner,2013-09-13 The Roman Empire is widely admired as a model of civilisation In this compelling new study Neil Faulkner argues that in fact it was nothing more than a ruthless system of robbery and violence War was used to enrich the state the imperial ruling classes and favoured client groups In the process millions of people were killed or enslaved Within the empire the landowning elite creamed off the wealth of the countryside to pay taxes to the state and fund the towns and villas where they lived The masses of people slaves serfs and poor peasants were victims of a grand exploitation that made the empire possible This system riddled with tension and latent conflict contained the seeds of its own eventual collapse
