London is one of the world's most popular destinations and visitors contribute approximately 14.9 billion of expenditure to the city every year Its tourism and events sectors are growing and over the last few years London has received more visitors than ever before However detailed accounts of the city's visitor economy are conspicuously absent This book analyses how the capital is developing as a destination through the expansion of tourism and events into new urban spaces The book outlines how parts of London not previously regarded as tourist territory are now subject to the visitor gaze with tourism spreading beyond established central zones into peripheral suburban and residential areas in part propelled by a big rise in peer to peer accommodation use Simultaneously London's airports and sports stadiums and their surrounds are becoming destinations in their own right New vantage points have been created allowing tourists to explore the city from above at night time or through tours given by the homeless via the opening up of the River Thames or through the transformation of local parks into eventscares The book explores these trends and shows how urban destinations expand In doing so it enhances our understanding of London and highlights the growing significance of tourism and events in global cities *City Tourism* Robert Maitland, Brent W. This book presents new research on the capacity of big cities to generate new tourism areas as visitors discover and help create new urban experiences off the beaten track It examines similarities and differences in these processes in a group of established world cities located in the global circuits of tourism The cities featured are Berlin New York London Paris and Sydney In these cities experienced city visitors are contributing to the discovery of new places to visit Many neighbourhoods close to the historic centre and to traditional attractions offer the mix of cultural difference and consumption opportunities that can create new experiences for distinctive groups of city users Each of the cities included in

the book offers rich experiences of the re imagining and re branding of neighbourhoods off the beaten track and informative stories of the complex relationships between visitors residents and others and of the ambitions of public policy to reproduce these new tourism experiences in other parts of the city World Tourism Cities brings together current research in each of the cities and relates the often separate field of tourism research to some of the mainstream themes of debate in urban studies addressing topics such as consumption markets and spaces Drawing on original research in this important group of cities this book has significant messages for public policy In addition the book engages directly with a range of important current academic debates about world cities about cities as sites of consumption and about the smaller scales at which urban neighbourhoods are being transformed The range of cities and the messages about the making of attractive places provides a timely resource for those focused in this area and the book will also have an appeal among those experienced and sophisticated city users that it focuses on

Sustainable Development in Post-Pandemic Africa

Fred Olayele,Yiagadeesen Samy,2022-10-21 With both domestic and external financing expected to dry up in the wake of the COVID 19 pandemic this book argues that there is a need for fresh ideas and new strategies for achieving sustainable development in Africa In addition to triggering the most severe recession in nearly a century the COVID 19 pandemic has disrupted global value chains causing unprecedented damage to healthcare systems economies and well being hitting the world s most vulnerable people the hardest Even before the pandemic Africa was suffering from the effects of low commodity prices sluggish GDP growth high debt levels low levels of domestic savings and weak private capital inflows This book argues that now as the continent emerges from the current crisis it will be important to reconfigure current financing sources under a forward looking framework that incorporates other non traditional financing tools and mechanisms such as public private partnerships sovereign wealth funds gender lens investing new growth drivers and emerging and disruptive technologies Finally the book concludes by adopting a sectoral approach and examining the real economy impacts of new growth drivers such as agriculture value chains industrialization tourism and the blue economy Drawing on a range of original research as well as insights from practice this book will be a useful guide for Global Development and African Studies researchers as well as for policy makers investors finance specialists and global business practitioners and entrepreneurs

Tourism in Transitions Dieter K. Müller,Marek Więckowski,2017-08-21 This book explores the relationship between transition and tourism geographies on a global scale discussing how tourism has been used as a tool to recover from decline or to manage change caused by event driven rapid transitions in a region s economy politics or environment With case studies from Europe America Asia and Africa it provides examples of how specific communities and industries around the globe have reacted for better or worse It also includes analyses of shifts within the tourism industry itself and examines the complex issues arising for localities that have to face the demands and standards of an increasingly globally interlinked tourism industry From Whistler to Angola casino gaming in Colorado to art tourism in Japan the contributors investigate such factors as tourism

induced community change the social and economic impacts second home owners have on rural communities in the developing world reconstruction of local tourism systems after crisis events such as wars and the competitiveness of ski areas in light of climate change Overall the book offers a thoughtful study of the role of geographical and temporal scales for tourism during periods of unprecedented transition equipping readers with new ways of conceptualizing change and adaptation

South Africa's Multilateral Diplomacy and Global Change Philip Nel,Ian Taylor,Janis Van der Westhuizen,2001 Post apartheid South Africa s foreign policy has accepted a range of leadership responsibilities within multilateral institutions This text assesses how in these various leadership capacities South Africa has been able to punch above its weight diplomatically Pretoria s intervention or support for a particular position has sometimes been crucial in breaking a deadlock or securing the co operation of others South Africa has also used its profile to act as a voice for the vulnerable smaller states in world affairs Based on their assessment of globalization as a process that holds some benefits but also many dangers for developing countries both the Mandela and Mbeki persidencies have used multilateral forums to push for a greater say by developing countries in global governance This position seems to indicate a reformist tendency in South African foreign policy This book examines whether Pretoria s multilateral diplomacy contributes to global transformation or whether South Africa s policies help maintain a fundamentally flawed global order
