Edwin Yang, Roger French, Laura Bruckman, 2019-06-13 Durability and Reliability of Polymers and Other Materials in
Photovoltaic Modules describes the durability and reliability behavior of polymers used in Si photovoltaic modules and
systems particularly in terms of physical aging and degradation process mechanisms characterization methods accelerated
exposure chamber and testing module level testing and service life prediction The book compares polymeric materials to
traditional materials used in solar applications explaining the degradation pathways of the different elements of a
photovoltaic module including encapsulant front sheet back sheet wires and connectors adhesives sealants and more In
addition users will find sections on the tests needed for the evaluation of polymer degradation and aging as well as
accelerated tests to aid in materials selection As demand for photovoltaics continues to grow globally with polymer
photovoltaics offering significantly lower production costs compared to earlier approaches this book will serve as a welcome
resource on new avenues Provides comprehensive coverage of photovoltaic polymers from fundamental degradation
mechanisms to specific case studies of durability and materials failure Offers practical actionable information in relation to
