

The background image is a high-quality photograph of a winter mountain scene. In the foreground, several evergreen trees are heavily laden with snow, their dark green needles contrasting with the white. The trees are positioned on a snowy slope. In the mid-ground, a deep valley is visible, filled with more snow-covered trees and patches of brown earth. The background features more snow-capped mountain peaks under a soft, hazy sky. The overall lighting is warm and golden, suggesting a sunrise or sunset. The text 'THE SKI REPORT' is overlaid in the upper center, and a dark blue rectangular box containing the text 'Winter 2023 / 24' is positioned below it.

Syngellakis,U. Probstl-Haider,F. Pineda,2018-07-23 This volume includes papers from the 8th International Conference on Sustainable Tourism Today tourism is becoming accessible to a growing number of people and is an important component of development not only in economic terms but also for knowledge and human welfare This collection of research aims to find ways to protect the natural and cultural landscape through the development of new solutions which minimise the adverse effects of tourism

The phenomenon has many more advantages than disadvantages. New forms of economic development and increasing wealth of human societies depend on tourism. Our knowledge of the world now includes a strong component due to tourism. Human welfare has physiological and psychological elements which tourism promotes both because of the enjoyment of knowing new territories and increasing contacts with near or far away societies and cultures. The tourism industry has nevertheless given rise to some serious problems including social costs and ecological impacts. Many ancient local cultures have practically lost their identity. Their societies have oriented their economy only to this industry. Both the natural and cultural rural or urban landscapes have also paid a high price for certain forms of tourism. These problems will persist if economic benefit is the only target leading to economic gains that eventually become ruinous. It is also a grave error to disregard the fact that visitors nowadays are increasingly demanding in cultural and environmental terms. The Global Change is a set of natural environmental changes that are strongly affected by technological and social developments. Natural changes are inherent in the Earth's ecosystem, the ecosphere. Also technological and social changes are inherent to mankind, the noosphere, and are now becoming widespread. Cities are growing rapidly and industry requires increasingly larger areas. Many traditional rural areas are being abandoned. Tourism should also play an important role in this context. Thus, interestingly, many historic agricultural districts have maintained or even recovered their local population numbers through intelligent strategies of tourism focused on nature and rural culture. Natural landscapes and biodiversity are becoming increasingly appreciated. The tourism industry must be able to respond to these aspirations.
