Associations Canada ,2007 Solar Energy Update ,1979 Changing Social Geography of Canadian Cities

Larry S. Bourne, David Ley, 1993 The contributors to this volume demonstrate the richness and diversity of the social landscapes and communities in Canadian urban centres emphasizing changes which occurred in the period from the mid 1960s to the early 1990s The nineteen non technical and integrative essays include reviews of the literature empirical studies and discussions of policy issues CONTENTS Introduction The Social Context and Diversity of Urban Canada David F Ley and Larry S Bourne Part One Patterns People and Place in Urban Canada Evolving Urban Landscapes D W Holdsworth Measuring the Social Ecology of Cities W K D Davies and R A Murdie Demography Living Arrangement and Residential Geography J R Miron Urban Social Behaviour in Time and Space D G Janelle Part Two Contexts Social Structure and Urban Space Migration Mobility and Population Redistribution E G Moore and M W Rosenberg The Emerging Ethnocultural Mosaic S H Olson and A L Kobayashi Work Labour Markets and Households in Transition D Rose and P Villeneuve Housing Markets Community Development and Neighbourhood Change Larry S Bourne and T Bunting Part Three Places Selected Locales Integrating Production and Consumption Industry Class Ethnicity and the Jews of Toronto D Hiebert Past Elites and Present Gentry Neighbourhoods of Privilege in the Inner City David F Ley From Periphery to Centre The Changing Geography of the Suburbs L J Evenden and G E Walker The Social Geography of Small Towns J C Everitt and A M Gill Part Four Needs Social Well being and Public Policy Social Planning and the Welfare State J T Lemon The Meaning of Home Home Ownership and Public Policy R Harris and G J Pratt Homelessness M J Dear and J Wolch Geography of Urban Health S M Taylor Changing Access to Public and Private Services Non family Childcare S Mackenzie and M Truelove Cities as a Social Responsibility Planning and Urban Form P J Smith and P W Moore Intellectual Property and Biodiversity Michelangelo Temmerman, 2011-12-12 Biotechnology is at the heart of heated debates about ethics safety economic development and about the control over the biological materials and technologies used The latter grossly called biodiversity issues relating to the application of intellectual property has been the subject of a wealth of literature Yet the situation of animal genetic resources specifically has only marginally been addressed so far Many books and articles address biotechnology and agriculture but have only plants and seeds in mind Case law and specific regulation is equally scarce Exacerbated by the so called erosion of animal genetic resources climate change the globalization of the market place and a strong concentration of markets animal genetic resources however demand specific analysis and adjustments in intellectual property law The decoupling of rights over animal genetic resources as an abstract concept from those over the concrete animals is a fact today The application of patents in this context became a full fledged part of the management of animal genetic resources This monograph analyzes against this background the impact of the patent system on ownership traditions in agriculture on animal welfare and on biodiversity It looks at how those factors in turn are likely to affect the shape of patent law and how they should affect it The

author hereby focuses on important specific issues arising including the following the underlying elements deciding on the shape of regulation innovation economic development agriculture human rights animal welfare the conservation of resources and equal trading conditions the continuing applicability of trademarks geographical indications copyright and trade secrets patentability rules and exclusions the extension of patent rights over progeny the meaning of essentially biotechnological processes the legal definitions of morality and ordre public in the context of animal welfare and the future of international patent law in the context of global governance theories With detailed investigation of how three major jurisdictions the European Union the United States and Canada have regulated the matter the book highlights unresolved issues in the laws dealing with animal genetic resources How do the usual principles of patent law affect ownership over animals in agriculture To what extent is patent law in accordance with neighbouring fields of regulation with relation to animal welfare How can intellectual property be used to alter stimulate or tackle developments in the realm of the conservation and promotion of biodiversity Questions like these are asked checked upon the more technical country studies and then used to put to test the adequacy of international patent regulation in a final chapter As a deeply informed overview of the arguments and discussion points this is the only book of its kind It links general discussions to the often technical and complicated patent regulations in the specific context of animal genetic resources It is sure to bring lawyers in the field closer to the policy debates and decision makers closer to the precise idiosyncrasies of patent law
