The Service-Dominant Logic of Marketing Robert F. Lusch,Stephen L. Vargo,2014-12-18 Expanding on the editors award winning article Evolving to a New Dominant Logic for Marketing this book presents a challenging new paradigm for the marketing discipline This new paradigm is service oriented customer oriented relationship focused and knowledge based and places marketing once viewed as a support function central to overall business strategy Service dominant logic defines service as the application of competencies for the benefit of another entity and sees mutual service provision rather than the exchange of goods as the proper subject of marketing It moves the orientation of marketing from a market to philosophy where customers are promoted to targeted and captured to a market with philosophy where the customer and supply chain partners are collaborators in the entire marketing process The editors elaborate on this model through an historical analysis clarification and extension of service dominant logic and distinguished marketing thinkers then provide further insight and commentary The result is a more comprehensive and inclusive marketing theory that will challenge both current thinking and marketing practice

The Quest for Professionalism Georges Romme,2016-01-29 Early pioneers in management thinking such as Henri Fayol and Peter Drucker conceived of management as a science based professional activity that serves the greater good Today however many organizations are managed by people demonstrating anything but professionalism resulting in mismanagement of risks as well as a one dimensional focus on short term results The key thesis in this book is that The Quest for Professionalism must be revitalized because the societal costs and damage caused by managerial amateurism are huge The book is about how to address this grand challenge for example by exploring whether and how a shared professional purpose and a professional body of knowledge can be developed While most work in this area has previously focused on management education The Quest for Professionalism adopts an inside out approach implying management scholarship is the driving force behind any intrinsic transformation of the profession at large Without management scholars playing an active role in advancing science based professionalism in the mould of engineering and medicine any attempt to professionalize management practice is doomed to fail Moreover Georges Romme demonstrates the professionalization quest has to move away from the idea of management being confined to a few people at the top toward management as a technology for distributing power and leadership throughout the organization
