**American Short Stories** Charles Sears Baldwin, 1904      **American Short Stories** Various Authors, 2020-09-28

How few years comprise the history of American literature is strikingly suggested by the fact that so much of it can be covered by the reminiscence of a single man of letters A life beginning in the 20 s had actual touch in boyhood with Irving and seized fresh from the press the romances of Cooper And if the history of American literature be read more exclusively as the history of literary development essentially American its years are still fewer I perceive says a foreign visitor in Austin s story of Joseph Natterstrom this is a very young country but a very old people Some critics indeed have been so irritated by the spreading of the eagle in larger pretensions as to deprecate entirely the phrase American literature Our literature they retort has shown no national essential difference from the literature of the other peoples using the same language How these carpers accommodate to their view Thoreau for instance is not clear But waiving other claims the case might almost be made out from the indigenous growth of one literary form Our short story at least is definitely American The significance of the short story as a new form of fiction appears on comparison of the staple product of tales before 1835 with the staple product thereafter 1835 is the date of Poe s Berenice Before it lies a period of experiment of turning the accepted anecdotes short romances historical sketches toward something vaguely felt after as more workmanlike This is the period of precocious local magazines and of that ornament of the marble topped tables of our grandmothers the annual Various in name and in color the annual gift books are alike externally in profusion of design and gilding internally in serving up as staples of their miscellany poems and tales Keepsakes they were called generically in England France and America their particular style might be Garland or Gem The Atlantic Souvenir earliest in this country so throve during seven years 1826 1832 as to buy and unite with itself 1833 its chief rival the Token The utterly changed taste which smiles at these annuals as at the clothes of their readers obscures the fact that they were a medium not only for the stories of writers forgotten long since but also for the earlier work of Hawthorne By 1835 the New England Magazine had survived its infancy and the Southern Literary Messenger was born with promise Since then since the realisation of the definite form in Poe s Berenice the short story has been explored and tested to its utmost capacity by almost every American prose writer of note and by many without note as the chief American form of fiction The great purveyor has been the monthly magazine Before 1835 then is a period of experiment with tales after 1835 a period of the manifold exercise of the short story The tales of the former have much that is national in matter the short stories of the latter show nationality also in form Nationality even provinciality in subject matter has been too much in demand The best modern literature knows best that it is heir of all the ages and that its goal should be not local peculiarity but such humanity as passes place and time Therefore we have heard too much doubtless of local color At any rate many purveyors of local color in fiction have given us documents rather than stories Still there was some justice in asking of America the things of America If the critics who begged us to be American have not always seemed to know

clearly what they meant still they may fairly be interpreted to mean in general something reasonable enough namely that we ought to catch from the breadth and diversity of our new country new inspirations The world then was looking to us in so far as it looked at all for the impulse from untrodden and picturesque ways for a direct transmission of Indians cataracts prairies bayous and Sierras Well and good But according to our abilities we were giving the world just that Years before England decided that our only American writers in this sense were Whitman Mark Twain and Bret Harte seventy years before the third of this perversely chosen group complacently informed the British public that he was a pioneer only in the sense of making the short story American in scenes and motives American writers were exploring their country for fiction north and south east and west up and down its history What we lacked was not appreciation of our material but skill in expressing it not inspiration but art We had to wait not indeed for Bret Harte in the 60 s but for Poe in the 30 s The material was known and felt and again and again attempted Nothing could expose more vividly the fallacy that new material makes new literature We were at school for our short story but we had long known what stories we had to tell In that sense American fiction has always been American

**“Music Makers” and World Creators** Michaela Hausmann, 2020-10-22 Many works of fantasy literature feature a considerable number of embedded poems some written by the authors themselves some borrowed and transformed from other authors Exploring the mechanisms of this mix and the interaction between individual poems and the overall narrative this monograph analyses the various forms and functions of embedded poems in major works of fantasy literature The choice of authors and texts shed light on the development of fantasy as a genre that frequently mixes prose and verse and thus

continues the long tradition of prosimetric practices after the Romantic period Not only does the analysis of the embedded poems allow for a new understanding of the individual works It also promises insights into shared literary historical roots cross influences between the authors and the role of the mix of poetry and prose for the imaginative and subversive potential of fantasy literature in general Providing comprehensive case studies of the forms and functions of embedded poems in fantasy literature this volume illuminates the emergence of modern fantasy and its impact on contemporary fantasy
