Set-up precautions

Before setting up the machine, heed the following safety precautions:

- place the machine in a safe place;
- keep children away from the machine;
- do not place the machine on hot surfaces or near open flames.

The machine is now ready to be set up.

Connection to the Power Supply

Electrical current can be dangerous, therefore the safety precautions must be rigorously respected.

 The espresso machine should be plugged into a suitable electrical outlet only.

 Make sure the power of the electrical outlet corresponds to the power indicated on the rating plate of the machine.

 Never use defective power cords or plugs. Defective parts must be replaced immediately by authorized service personnel.

Warning! If an extension cord is used, make sure that it has a minimum diameter of 1 mm² and that it has a three-pole outlet/ plug.

The voltage of the machine has been set during production at the factory. Make sure that the voltage of the power mains corresponds to that on the rating plate underneath the machine.

Make sure that the main switch (3) is in the "0" position before plugging the machine into the electrical outlet.

Packaging

The original box and packing materials have been constructed specifically to protect the machine during shipping. It is recommended to keep the box and packing materials for future shipping.

 For your own safety and that of others, carefully heed all safety precautions indicated on pages 22 and 23.

Filling water tank

- Remove the drip tray (9) and accessories box (13).
- 12 Remove the water tank by pulling it

out from the front of the machine.

14 Rise the tank and fill it with fresh water. Avoid overfilling the tank.

15 Replace the water tank. Make sure the water tube hangs straight into the tank. Do not bend the tube.

- Replace the drip tray (9) and accessories box (13).

The water tank also can be filled without removing the tank.

Simply pour water into the water tank funnel (12).

 Always fill water tank only with fresh, non-spending water. Never fill with hot water or other liquids that could damage the tank.

 Never use the machine without water. Before turning the machine on, always make sure that the water tank is filled.

Priming the system

Before the first use of the machine, after a prolonged period without use, whenever the water tank has run completely dry, or after drawing steam, the system must be primed.

16 Direct the steam arm on the drip tray. Open the steam/hot water knob (8) until a steady stream of water is dispensed. Close the knob. Insert the filter holder (14) into the brew head (4) to pre-heat the filter holder. The machine is now ready to dispense coffee.

Brewing espresso

Press the main switch (3) and wait for the green light (2) to come on. This indicates that the machine has reached the proper temperature.

18 Put 1 or 2 doses of ground coffee in

the filter, without pressing it, in order to obtain 1 or 2 espresso servings.

With the special "Crema" (15) filter holder supplied with the machine it is not necessary to change the filter for one or two servings.

17 Insert the filter holder into the brew head, turning from left to right until it locks into place.

Release the handle of the filter holder. The filter holder will automatically move slightly to the left.

This movement guarantees the perfect operation of the filter holder.

19 Place the one or two cups on the drip tray (9) below the filter holder ensuring that they are correctly positioned under the coffee spouts.

Make sure that the green "ready" light (2) is on then press the coffee button (5).

When the cups contain the desired amount of coffee, press the coffee button (5) to stop the dispensing.

Wait a few seconds, then remove the filter holder and empty the used grounds.

Cleaning hint: keep the filter of the filter holder clean by removing it and washing it with water.

Choosing the quality of the coffee

As a general rule all types of coffee on the market can be used, however, since coffee is a natural product and its flavor changes according to its origin and blend, it is advisable to try different types in order to find the one that best suits your personal tastes.

For the best results we recommend using a blend which is specifically prepared for espresso machines.
