

A photograph of a church service. In the foreground, the back of a person's head and shoulders are visible. Their right arm is raised, with the hand open and fingers spread, reaching towards a large screen at the front of the church. The screen displays a bright, blue, abstract image that resembles a mountain or a large rock formation. The church interior is dimly lit, with warm, golden light from candles or lamps visible in the background, creating a bokeh effect. Other people are visible in the background, some with their hands raised.

Freedom Church of the Poor Colleen Wessel-McCoy, 2021-08-19 When King looked over into the promised land and tried to discern how we would get there he called the poor to lead the way The Poor People s Campaign was part of a political strategy for building a movement expansive enough to tackle the enmeshed evils of racism poverty and war In Freedom Church of the Poor Martin Luther King Jr s Poor People s Campaign Colleen Wessel McCoy roots King s political vision solidly in his theological ethics and traces the spirit of the campaign in the community and religious leaders who are responding to the devastating crises of inequality today Handbook of Contemporary Preaching, 2nd Edition Michael Duduit, 2024-07-15 The revised and updated 2nd edition of Handbook of Contemporary Preaching is a comprehensive textbook on preaching and teaching the Bible Pastors will be better equipped after reading and learning from some of the most notable scholars and pastors on the topic of preaching The Cinema of Yakov Protazanov F. Booth Wilson, 2024-04-12 Best known for *Aelita* 1924 the classic science fiction film of the Soviet silent era Yakov Protazanov directed over a hundred films in a career spanning three decades Called the Russian D W Griffith in the 1910s for his formative role in the first movies in the last years of the Russian Empire he fled the Civil War and maintained a successful career in Europe before making an unusual decision to return to Russia now under Soviet power There his films continued their remarkable success with audiences undergoing a bewildering and often brutal revolutionary transformation Rather than treating him as an indistinct if capable craftsman The Cinema of Yakov Protazanov argues that his films are suffused with a unique creative vision that reflects both his mindset as a traditional Russian intellectual and his experience of dislocation and migration after 1917 As he adapted his films to revolutionary culture they intermingled different voices and reinterpreted his past work from a disavowed era Offering fresh perspectives of Protazanov s films the book will give readers a new appreciation of his career The book offers a uniquely valuable vantage point from which to explore how cinema reflected a society in transformation and a seminal moment in the development of cinematic art *Constantine and the Christian Empire* Charles Odahl, 2003-10-04 Drawing on over a quarter of a century of the author s research and experience this book illustrated with ninety two photographs and eight maps is the standard work on the man and his life for scholars students and all those interested in Roman imperial early Christian and Byzantine imperial history *The Story of the American Board* William Ellsworth Strong, 1910 London Explored Peter Dazeley, Mark Daly, 2021-11-30 Explore sixty of London s most surprising secret and fascinating places **Prison Capital** Lydia Pelot-Hobbs, 2023-10-16 Every year between 1998 to 2020 except one Louisiana had the highest per capita rate of incarceration in the nation and thus the world This is the first detailed account of Louisiana s unprecedented turn to mass incarceration from 1970 to 2020 Through extensive research Lydia Pelot Hobbs illuminates how policy makers enlarged Louisiana s carceral infrastructures with new prisons and jail expansions alongside the bulking up of police and prosecutorial power At the same time these infrastructures were the products of multiscale

crises the swings of global oil capitalism liberal federal court and policy interventions the rise of neoliberal governance and law and order austerity and racist and patriarchal moral panics surrounding crime However these crises have also created fertile space for anticarceral social movements From incarcerated people filing conditions of confinement lawsuits and Angola activists challenging life without parole to grassroots organizers struggling to shrink the New Orleans jail following Hurricane Katrina and LGBTQ youth of color organizing against police sexual violence grassroots movements stretch us toward new geographies of freedom in the lineage of abolition democracy Understanding Louisiana's carceral crisis extends our understanding of the interplay between the crises of mass criminalization and racial capitalism while highlighting the conditions of possibility for dismantling carceral power in all its forms

California & the Fictions of Capital George L. Henderson, 1999 Between the frequently recounted events of the Gold Rush and the Great Depression stretches a period of California history that is equally crucial but less often acknowledged In his fresh synthetic consideration of these in between years George L. Henderson points specifically to the take off of California's rural juggernaut between the 1880s and middle 1920s the upward spiral of city bids for country dollars and rural bids for urban investments These decades were salve for mining's risky finances yet groundwork for the chaotic 1930s Moreover Henderson argues that much like the two important periods which framed it this era produced a cultural and literary apparatus that attempted to grapple with capital's machinations if only to legitimate them in the end Central to California and the Fictions of Capital is a theory of how the circulation of capital wove itself into agriculture The book asks why it mattered to capital that agriculture was based in Nature and then explores the procedures through which images of Nature became central to capitalism's story of itself What unique possibilities did Nature offer to circuits of capital and what was their role in suturing the urban and rural together How did boom and bust intervene and set the pace for regional change How was capital linked to the racializing of working bodies And why was the capitalist imperative expressed in landscape alterations like irrigation Such are the key questions informing this bold far reaching volume Beyond political economy the book also looks to the rural juggernaut's cultural and literary work which was stamped by celebratory if fretful ruminations In all sorts of texts but especially in novels by Frank Norris Mary Austin Harold Bell Wright and many other writers difficult questions surfaced Capital was seen in terms of its spillage into rural frontiers just as rural frontiers were seen in terms of movements of capital Capital was the new geography of money But for whom did it work Which identities did it favor In mapping the real and imaginary realms that capital occupied Henderson locates the banker land developer and engineer heroes of California fiction as well as the fictionalized new woman of the capitalist agrarian West He unravels the colliding representations of race gender and class while linking their treatment to the naturalizing rhetoric of capital's agrarian turn In part a tour of California as a virtual laboratory for refining the circulation of capital and in part an investigation of how the state's literati with rare exception reconceived economy in the name of class

gender and racial privilege this study will appeal to all students and scholars of California's and the American West's economic, environmental, and cultural past

Workers Can Win Ian Allinson, 2022-10-20 The Covid climate and cost of living crises all hang heavy in the air. It's more obvious than ever that we need radical social and political change. But in the vacuum left by defeated labour movements, where should we begin? For longtime workplace activist Ian Allinson, the answer is clear: organising at work is essential to rebuild working class power. The premise is simple: organising builds confidence, capacity, and collective power, and with power we can win change. *Workers Can Win* is an essential practical guide for rank and file workers and union activists. Drawing on more than 20 years of organising experience, Allinson combines practical techniques with an analysis of the theory and politics of organising and unions. The book offers insight into tried and tested methods for effective organising. It deals with tactics and strategies and addresses some of the roots of conflict, common problems with unions, and the resistance of management to worker organising. As a 101 guide to workplace organising with politically radical horizons, *Workers Can Win* is destined to become an essential tool for workplace struggles in the years to come

Radicals in the Barrio Justin Akers Chacón, 2018-06-26 *Radicals in the Barrio* uncovers a long and rich history of political radicalism within the Mexican and Chicano working class in the United States. Chacón clearly and sympathetically documents the ways that migratory workers carried with them radical political ideologies, new organizational models, and shared class experience as they crossed the border into southwestern barrios during the first three decades of the twentieth century. Justin Akers Chacón's previous work includes *No One is Illegal: Fighting Racism and State Violence on the U.S.-Mexico Border* with Mike Davis

Sacred Places North America Brad Olsen, 2008-03-01 This revised and updated comprehensive travel guide examines North America's most sacred sites for spiritually attuned explorers. Important archaeological, geological, and historical destinations from coast to coast are exhaustively examined, from the weathered pueblos of the American Southwest and the medicine wheels of western Canada to Graceland and the birthplace of Martin Luther King Jr. Histories and cultural contexts are objectively surveyed along with the latest academic theories and insightful metaphysical ruminations. Detailed maps, drawings, and travel directions are also included

web supervised machine learning in wind forecasting an python machine learning aug 03 2021 applied machine learning with a solid foundation in theory revised and expanded for tensorflow 2 gans and reinforcement learning purchase of the print or kindle book includes a free ebook in the pdf format

2204 00495 physics informed shallow machine learning for wind - Apr 23 2022

web apr 1 2022 we train supervised learning algorithms using the past history of wind to predict its value at a future time horizon using data from a single location and time horizon we compare systematically several algorithms where we vary the input output variables the memory of the input and the linear vs non linear learning model

frontiers applications of machine learning to wind engineering - Jul 27 2022

web mar 16 2022 to reduce the demand for labelled data in ml applications to wind engineering both unsupervised learning and semi supervised learning including physics informed machine learning are promising alternatives to

two supervised machine learning approaches for wind velocity - Jun 25 2022

web sep 1 2020 of the two approaches we found that lstm proved to be the most capable supervised learning model during more capricious wind conditions and made competent windspeed predictions with an average root mean square error of 0.61 m/s averaged across two drones when trained on at least 20 min of flight data

physics informed machine learning for wind speed prediction - Sep 28 2022

web jan 7 2023 here we take an alternative data driven approach based on supervised learning we analyze massive datasets of wind measured from anemometers located at 10 m height in 32 locations in central and north west italy we train supervised learning algorithms using the past history of wind to predict its value at future horizons

supervised machine learning in wind forecasting and ramp - Apr 04 2023

web doi 10.1016/c2019.0.03735.1 corpus id 243569487 supervised machine learning in wind forecasting and ramp event prediction inproceedings 2020supervisedml title supervised machine learning in wind forecasting and ramp event prediction author year 2020

an interdisciplinary machine learning approach for wind speed - Feb 19 2022

web wind speed forecasting for the specified heights using rnn lstm and gru ii the proposed computational models based on ai by supervised machine learning elucidate the wind speed behavior and allow accurate wind speed prediction at different anemometric heights e.g. 10, 0, 25, 70, 81, 80 m and 101, 80 m

learning based short term wind speed forecasting models for - Aug 28 2022

web sep 1 2023 based on historical study learning models are classified into two subclasses e.g. classical machine learning and advanced machine learning as shown in table 3 ordinary least square regression models deep learning and ensemble learning models have supervised learning models

supervised machine learning in wind forecasting and ramp event - Jul 07 2023

web supervised machine learning in wind forecasting and ramp event prediction provides an up to date overview on the broad area of wind generation and forecasting with a focus on the role and need of machine learning in this emerging field of knowledge

supervised machine learning in wind forecasting and ramp - Oct 10 2023

web supervised machine learning in wind forecasting and ramp event prediction provides an up to date overview on the broad area of wind generation and forecasting with a focus on the role and need of machine learning in this emerging field of

knowledge various regression models and signal decomposition techniques are presented and

jmse free full text machine learning based approach to wind - Mar 23 2022

web nov 4 2023 as wind energy continues to be a crucial part of sustainable power generation the need for precise and efficient modeling of wind turbines especially under yawed conditions becomes increasingly significant addressing this the current study introduces a machine learning based symbolic regression approach for elucidating

data augmented sequential deep learning for wind power forecasting - Jan 01 2023

web nov 15 2021 this paper initially scrutinizes the usefulness of data augmentation approaches in wind power forecasting and proposes a multi input and multi output prediction algorithm with verified superiority inferences on the results of multistep forecasting five wind turbines with various topologies conclusions are given as follows

supervised machine learning in wind forecasting and ramp - Sep 09 2023

web jan 20 2020 supervised machine learning in wind forecasting and ramp event prediction provides an up to date overview of the broad area of wind generation and forecasting with a focus on the role and

supervised machine learning in wind forecasting and ramp - Jun 06 2023

web description supervised machine learning in wind forecasting and ramp event prediction provides an up to date overview on the broad area of wind generation and forecasting with a focus on the role and need of machine

supervised machine learning in wind forecasting and ramp - May 05 2023

web jan 21 2020 description supervised machine learning in wind forecasting and ramp event prediction provides an up to date overview on the broad area of wind generation and forecasting with a focus on the role and need of machine learning in this emerging field of knowledge

supervised machine learning in wind forecasting and ramp - Nov 30 2022

web jan 21 2020 supervised machine learning in wind forecasting and ramp event prediction provides an up to date overview on the broad area of wind generation and forecasting with a focus on the role and need of machine learning in this emerging field of knowledge various regression models and signal decomposition techniques are

supervised machine learning in wind forecasting and ramp - Aug 08 2023
