Federal Rivers Dustin E Garrick,George R M Anderson,Daniel Connell,Jamie Pittock,2014-01-31 This book provides a critical analysis of the impact of borders and divided governance on large rivers in federal political systems The OECD has identified the global water crisis as one of governance and policy fragmentation Population and economic

The Human Face of Water Security David Devlaeminck,Zafar Adeel,Robert Sandford,2017-03-09 This volume collects essays from academics and practitioners from a diversity of areas and perspectives in order to discuss water security at various levels and to illuminate the central idea of water security its focus on the individual Beginning with the big picture this book aims to illustrate the depth of the water security crisis and its interconnections with other aspects of societal development It particularly draws a connection to the 2030 Agenda for Sustainable Development and discusses that challenges faced in meeting the 17 sustainability development goals SDG by the year 2030 Moving from international to domestic and community perspectives this book provides a unique analysis of issues and solutions to the water issues we face today in light of the ever looming global changes brought on by climate change Over the past few decades the recognition of our common need for water has increased as policymakers have sought to place more focus on the individual within policy After the recognition of water and sanitation as a fundamental human right by the United Nations General Assembly in 2010 there is increasing recognition of the individual as the building block for the struggle for water security This reality also intersects with adverse impacts of global climate change and the book responds to the broader question will clean and safe water be available where we need it

and when we need it in the future

Indigenous Water and Drought Management in a Changing World Miguel Sioui, 2022-05-19 Indigenous Water and Drought Management in a Changing World presents a series of global case studies that examine how different Indigenous groups are dealing with various water management challenges and finding creative and culturally specific ways of developing solutions to these challenges With contributions from Indigenous and non Indigenous academics scientists and water management experts this volume provides an overview of key water management challenges specific to Indigenous peoples proposes possible policy solutions both at the international and national levels and outlines culturally relevant tools for assessing vulnerability and building capacity In recent decades global climate change particularly drought has brought about additional water management challenges especially in drought prone regions where increasing average temperatures and diminishing precipitation are leading to water crises Because their livelihoods are often dependent on the land and water Indigenous groups native to those regions have direct insights into the localized impacts of global environmental change and are increasingly developing their own adaptation and mitigation strategies and solutions based on local Indigenous knowledge IK Many Indigenous groups around the globe are also faced with mounting pressure from extractive industries like mining and forestry which further threaten their water resources The various cases presented in Indigenous Water and Drought Management in a Changing World provide much needed insights into the particular issues faced by Indigenous peoples in preserving their water resources as well as actionable information that can inform future scientific research and policymaking aimed at developing more integrated region specific and culturally relevant solutions to these critical challenges Includes diverse case studies from around the world Provides cutting edge perspectives about Indigenous peoples water management issues and IK based solutions Presents maps for most case studies along with a summary box to conclude each chapter

The State of Coral Reef Ecosystems of the United States and Pacific Freely Associated States, 2005 *Adaptive Capacity and Environmental Governance* Derek Armitage, Ryan Plummer, 2014-07-08 Rapid environmental change calls for individuals and societies with an ability to transform our interactions with each other and the ecosystems upon which we depend Adaptive capacity the ability of a social ecological system or the components of that system to be robust to disturbances and capable of responding to changes is increasingly recognized as a critical attribute of multi level environmental governance This unique volume offers the first interdisciplinary and integrative perspective on an emerging area of applied scholarship with contributions from internationally recognized researchers and practitioners It demonstrates how adaptive capacity makes environmental governance possible in complex social ecological systems Cutting edge theoretical developments are explored and empirical case studies offered from a wide range of geographic settings and natural resource contexts such as water climate fisheries and forestry Of interest to researchers policymakers and resource managers seeking to navigate and understand social ecological change in diverse geographic settings and resource contexts

Cold Region Atmospheric and Hydrologic Studies. The Mackenzie GEWEX Experience

Ming-ko Woo,2008-01-08 This book presents decade long advances in atmospheric research in the Mackenzie River Basin in northern Canada which encompasses environments representative of the coldest areas on Earth Collaborative efforts by a team of about 100 scientists and engineers have yielded knowledge entirely transferable to other high latitude regions in America Europe and Asia **Highlights of the Mackenzie River Basin Board's State of the Aquatic Ecosystem Report 2003** Mackenzie River Basin Board (Canada),2004 **Water for the Americas** Alberto Garrido,Mordechai Shechter,2014-08-07 The chapters in this volume are peer reviewed editions of the papers presented at the 7th meeting of the Rosenberg International Forum on Water Policy which was held in Buenos Aires Argentina on November 15 17 2010 The theme for Forum VII was Water for the Americas Challenges and Opportunities This Forum was unique in examining the water problems of the Americas and identifying water management experience gleaned in other parts of the world that might be useful in addressing the problems of the Americas The sessions illustrated how the water problems of the Americas are common problems differing only in degree from basin to basin There was unanimity among the participants about the need for all inhabitants of the Americas to work together to ensure that everyone has access to adequate quantities of healthy water supplies and to appropriate sanitation services This volume s approach is to identify different responses and policies that address common issues and learn from contrasts and experiences The value and potential that this approach affords is that it provides critical judgments about what has worked well and what needs to be done to gain a better future for the Americas water resources and society Some issues covered in the volume are so pressing and urgent chief among them is serving the unserved that any delays putting out new facilities in many a rural areas of Central America may cost lives and reduce the outlook for children Additionally the volume makes clear that the outlook for the poorest and the future of hundreds of growing cities are threatened by climate change This book looks into the future by analyzing present and relevant data and gains insight from the different developmental stages of the hemisphere **Ecosystem-Based Management for the Oceans** Karen McLeod,Heather Leslie,2012-09-26 Conventional management approaches cannot meet the challenges faced by ocean and coastal ecosystems today Consequently national and international bodies have called for a shift toward more comprehensive ecosystem based marine management Synthesizing a vast amount of current knowledge Ecosystem Based Management for the Oceans is a comprehensive guide to utilizing this promising new approach At its core ecosystem based management EBM is about acknowledging connections Instead of focusing on the impacts of single activities on the delivery of individual ecosystem services EBM focuses on the array of services that we receive from marine systems the interactive and cumulative effects of multiple human activities on these coupled ecological and social systems and the importance of working towards common goals across sectors Ecosystem Based Management for the Oceans provides a conceptual framework for students and professionals who want to understand and utilize this powerful approach And it employs case studies that draw on the experiences of EBM practitioners to demonstrate how EBM principles can be

applied to real world problems The book emphasizes the importance of understanding the factors that contribute to social and ecological resilience the extent to which a system can maintain its structure function and identity in the face of disturbance Utilizing the resilience framework professionals can better predict how systems will respond to a variety of disturbances as well as to a range of management alternatives Ecosystem Based Management for the Oceans presents the latest science of resilience while it provides tools for the design and implementation of responsive EBM solutions
