The Tactical Satellite Communications Field Manual FM 24 11 deals with military satellite communications. In the preface it states: This manual is a basic reference document for using the tactical satellite TACSAT communications system. The purpose of the manual is to translate doctrine and detailed technical data into practical guidance for planning and operating a TACSAT communications system. It provides guidance for deploying, controlling, and managing TACSAT communications systems and terminals. This manual includes a description of the TACSAT communications equipment. It also provides instructions for its doctrinal use. This doctrine provides a firm foundation of guidance to TACSAT communications users. The intended users of this manual are operators, supervisors, planners, and to some extent maintainers. Operators and supervisors will use the manual for basic instruction and as a guide on how to use the equipment. Planners will use it for system and network planning. Maintainers can use it as an adjunct to the technical manual and as a quick reference when needed. This manual is produced by Headquarters US Army Training and Doctrine Command TRADOC.
