

Periodic Trends Worksheet

Directions: Use your notes to answer the following questions.

1. Rank the following elements by increasing atomic radius: carbon, aluminum, oxygen, potassium.

Oxygen < Carbon < Aluminum < Potassium

2. Rank the following elements by increasing electronegativity: sulfur, oxygen, neon, aluminum.

Neon < Aluminum < Sulfur < Oxygen

3. Why does fluorine have a higher ionization energy than iodine?

Fluorine has nine protons attracting 9 electrons which are much closer to the nucleus compared to Iodine. This results in smaller size of Fluorine than Iodine making it difficult to remove an electron from the atom.

4. Why do elements in the same family generally have similar properties?

Because they have same number of electrons in the outer shell (valence electrons) which take part in chemical reaction.

5. Indicate whether the following properties increase or decrease from left to right across the periodic table.

- | | |
|--|------------------|
| a. atomic radius (excluding noble gases) | Decreases |
| b. first ionization energy | Increases |
| c. electronegativity | Increases |

6. What trend in atomic radius occurs down a group on the periodic table? What causes this trend?

Atomic radius **increases** down the group on the periodic table. As we compare the elements down the group, the effective nuclear charge increases, but at the same time the outermost electrons are found in the shell that is farther away from the nucleus. Also the number of screening electrons increases. This results in reduced attraction between the nucleus and the outermost electrons.

7. What trend in ionization energy occurs across a period on the periodic table? What causes this trend?

Ionization energy **increases** from left to right across the period. The atomic size becomes smaller from left to right. So it becomes harder to remove electron from the atom. Hence the energy required to do so (Ionization Energy) increases.

Hollingsworth, Silvia E. Ybarra, 2017-09-07 A proven approach to better teaching and learning Explicit Direct Instruction EDI an approach based on the premise that all children can learn helps teachers deliver well designed well taught lessons that significantly improve achievement for all learners Authors Hollingsworth and Ybarra have

refined and extended their highly successful methods in this second edition of their bestselling book. Written in an easy to read entertaining style, this resource provides K-12 teachers with concrete strategies, detailed sample lessons and scenarios that illustrate what EDI techniques look like in inclusive and diverse classrooms. With chapters covering the individual components of EDI such as checking for understanding and activating prior knowledge, this updated edition refines the methods so that they are even more effective and easier to implement. Readers will find:

- Strategies for continuous systematized student engagement
- Expanded corrective feedback strategies
- Clear alignment to the latest content standards
- A new field-tested strategy for skill development and guided practice
- Expanded information about differentiation and scaffolding

Combining educational theory, brain research and data analysis, this is a fine-tuned step-by-step guide to a highly effective teaching method. Before EDI, our school was a ship adrift at sea with everyone rowing in different directions. EDI has provided us with a framework for instruction and a common language that allowed us to all row in the same direction.

Benjamin Luis, Principal, Liberty Middle School, Lemoore, CA: EDI makes students accountable. They see now that school is a place to work and learn and play and they love it. Because even though it is hard, they are doing well.

Reauthorization of the Higher Education Act of 1965. United States. Congress. Senate. Committee on Labor and Human Resources. Subcommittee on Education, Arts, and Humanities, 1991. This volume presents transcripts of seven hearings held in May 1991 on the reauthorization of the Higher Education Act of 1965. Of the hearings held in the District of Columbia, the first focused on the Pell Grant and Stafford Loan programs and featured witnesses from around the country addressing educational finance. The second hearing focused on the process of accreditation, certification and licensing that determines institutional participation in the Federal student aid programs and featured witnesses from educational institutions and professional associations. The final hearing presented the testimony of college executives, representatives of educational associations and others on Title VI which supports international education and Title III concerned with institutional aid and funding for institutional facilities. The hearings in other cities provided an opportunity for legislators to hear additional suggestions and recommendations from students, teachers, administrators, institutional executives and state agencies on the reauthorization of higher education programs. Included are the prepared statements of the witnesses as well as additional statements, correspondence and supplemental material. JB

It's Debatable! Dana L. Zeidler, Sami Kahn, 2014-02-01. Functional scientific literacy requires an understanding of the nature of science and the skills necessary to think both scientifically and ethically about everyday issues from the introduction to It's Debatable!. This book encourages scientific literacy by showing you how to teach the understanding and thinking skills your students need to explore real-world questions like these:

- Should schools charge a tax to discourage kids from eating unhealthy foods?
- Should local governments lower speed limits to reduce traffic fatalities?
- Should pharmaceutical companies be allowed to advertise prescription drugs directly to consumers?

At the core of the

exploration is the Socioscientific Issues Framework The framework gives students practice in the research analysis and argumentation necessary to grapple with difficult questions and build scientific literacy After introducing the concept of the framework and explaining how it aligns with the Next Generation Science Standards the book shows you how to implement it through seven units targeted to the elementary middle and high school levels You even find out how to develop your own socioscientific issues curriculum Both practical and content rich It s Debatable doesn t shy away from controversy Instead the authors encourage you and your students to confront just how messy the questions raised by science and pseudoscience can be After all as the authors note The only way for our students to be prepared for participation in societal discourse is to have practice in their school years and what better place than the science classroom
