Tourism and Citizenship Raoul Bianchi, Marcus Stephenson, 2014-02-24 More than sixty years since the 1948 Universal Declaration of Human Rights first enshrined the right to freedom of movement in an international charter of human rights the issue of mobility and the right to tourism itself have become increasingly significant areas of scholarly interest and political debate However despite the fact that cross border travel implies certain citizenship rights as well as the material capacity to travel the manifold intersections between tourism and citizenship have not received the attention they deserve in the literature This book endeavours to fill this gap by being the first to fully examine the role of tourism in wider society through a critically informed sociological reflection on the unfolding relationships between international tourism and distinct renderings of citizenship with particular emphasis on the ideological and political alignments between the freedom of movement and the right to travel The text weaves its analysis of citizenship and travel in the context of addressing large scale societal transformations engendered by globalization neoliberalism and the geopolitical realignments between states as well as

comprehending the internal reconfiguring of the relationship between citizens and states themselves By doing so it focuses on key themes including tourism and social citizenship rights race culture and minority rights states markets and the freedom of movement tourism peace and geo politics consumerism and class and ethical tourism global citizenship and cosmopolitanism The book concludes that the advancement of genuinely democratic and just forms of tourism must be commensurate with demands for distributive justice and a democratic politics of mobility encompassing all of humanity This timely and significant contribution to the sociology and politics of international tourism through the lens of citizenship is a must read for students and scholars in both in the fields of tourism and social science The royalties received from this book will be donated to the International Porter Protection Group

The Political Economy of City Branding Ari-Veikko

Anttiroiko, 2014-02-24 Globalization affects urban communities in many ways. One of its manifestations is increased intercity competition which compels cities to increase their attractiveness in terms of capital entrepreneurship, information expertise, and consumption. This competition takes place in an asymmetric field with cities trying to find the best possible ways of using their natural and created assets, the latter including a naturally evolving reputation or consciously developed competitive identity or brand. *The Political Economy of City Branding* discusses this phenomenon from the perspective of numerous post-industrial cities in North America, Europe, East Asia, and Australasia. Special attention is given to local economic development policy and industrial profiling, and global city rankings are used to provide empirical evidence for cities' characteristics and positions in the global urban hierarchy. On top of this, social and urban challenges such as creative class struggle are also discussed. The core message of the book is that cities should apply the tools of city branding in their industrial promotion and specialization but at the same time take into account the special nature of their urban communities and be open and inclusive in their brand policies in order to ensure optimal results. This book will be of interest to scholars and practitioners working in the areas of local economic development, urban planning, public management, and branding.

Rural-Urban

Linkages for Sustainable Development Armin Kratzer, Jutta Kister, 2020-09-23 This book critically examines different forms of urban-rural links for sustainable development in different countries. As intertwined processes of globalization, digitalization, environmental challenges, and the search for sustainable development continue, rural and urban areas around the world become increasingly interconnected and interdependent. This book contributes to understanding the role of this growing interconnectedness from an economic-geographical perspective. It does so by theoretically and empirically addressing the various existing linkages such as food networks, value chains, and regional governance at local, regional, national, and international levels. In doing so, contributions extend and contrast existing approaches dealing with urban and rural areas separately by considering the interplay between these two as well as their consequences for sustainability transition pathways. This edited volume adds to the academic and policy debate by bringing together a variety of concepts.

and themes in order to shift the research and policy agenda away from simple dichotomy to different notions of rural urban linkages Offering multidisciplinary insights into rural urban linkages the book will be of interest to decision makers practitioners and researchers in the fields of economic geography regional planning food studies and economics The Times Index ,2013-06 Indexes the Times Sunday times and magazine Times literary supplement Times educational supplement Time educational supplement Scotland and the Times higher education supplement
