Industrial Design Rights Brian W. Gray, 2020-10-14 This book is a revised and updated edition of a major work first published in 2001 under the auspices of the Intellectual Property Committee of the International Bar Association. As a comparative cross jurisdictional analysis of the practice, theory, scope and types of design protection, it will continue to be of immeasurable value to lawyers and others involved in industrial design. Industrial designs are particularly interesting because the laws in many countries attempt in different ways to find a balance between protection for the artistic creation and the freedom to use the purely functional, and between the proprietary rights of the creator and the public domain rights of the competitor. The third edition is comprised of twenty-five country reports, each written by one or more prominent intellectual property lawyers in the country covered. To facilitate cross jurisdictional comparison, each report is structured according to the following sequence of topics: new developments in each jurisdiction; conventions and legislation; definition of what constitutes a protectable design; originality; novelty; duration of protection; infringement; defences to infringement; procedures for filing; application for registration and expunging; cancelling or varying registration. Prominent new developments covered in the third edition include new chapters from South Korea, Russia and Turkey, as well as continuing coverage of the impact of the European Community Design Directive, the adoption of the Hague Agreement with corresponding major changes to US and Canadian design law and practice, the newly revised Japanese Design Law and China's revised Guidelines for Examination. Each jurisdiction's currently applicable legislation, regulation and case law is summarized and analysed.
