**Conducting Educational Design Research** Susan

McKenney,Thomas C Reeves,2013-06-19 Educational design research blends scientific investigation with systematic development and implementation of solutions to educational problems Empirical investigation is conducted in real learning settings not laboratories to craft usable and effective solutions At the same time the research is carefully structured to produce theoretical understanding that can serve the work of others To support graduate students as well as experienced researchers who are new to this approach Conducting Educational Design Research integrates multiple perspectives of educational design research throughout this three part book Part one clarifies the educational design research origins approach and outcomes It also presents a generic model portraying the overall process Part two discusses the constituent elements of the model in detail these are analysis and exploration design and construction evaluation and reflection and implementation and spread Part three offers recommendations for proposing reporting and advancing educational design research Through related readings and richly varied examples Conducting Educational Design Research offers clear and well documented guidance on how to conceptualize and conduct this stimulating form of inquiry For decades policies for educational research worldwide have swung back and forth between demanding rigor above all other concerns and increasing emphasis on impact These two qualities need not be mutually exclusive This volume supports readers in grasping and realizing the potential of educational design research It demonstrates how rigorous and relevant investigation can yield
