

# UNIT 14

## EXERCISE 14.1 A HOUSEHOLD'S BALANCE SHEET

Consider a family of two parents and two children who have a mortgage on their home. They have paid off half the mortgage. The family also owns a car and a portfolio of shares in companies. They spend their income on food, clothing, and private school fees, and have retirement savings held in a pension fund.

1. Which of these items would be on a balance sheet for the household?
2. Using the example of the bank's balance sheet in Figure 10.16 as a guide, construct an annual balance sheet for your hypothetical household. You may want to research the typical values for these items for a family of this type.

### Introduction

The question trains students to work with balance sheets and links the concept to their own experience.

### Answer

1. A balance sheet shows the stock of assets and liabilities measured at a point in time. Hence everything in the list above will be included except the flows of income and expenditure.
2. The balance sheet below is per year. Assume accumulated car depreciation is £2,000.

| Assets (£)                        |         | Liabilities (£)   |         |
|-----------------------------------|---------|-------------------|---------|
| Property                          |         | Long-term debt    |         |
| House (market value)              | 200,000 | Mortgage (50%)    | 100,000 |
| Car                               | 17,000  |                   |         |
| Total                             | 217,000 |                   |         |
| Less car depreciation             | 2,000   |                   |         |
| Long-term investments             |         |                   |         |
| Shares (market value)             | 5,000   |                   |         |
| Retirement savings (market value) | 5,000   |                   |         |
| Total investments                 | 10,000  |                   |         |
| Total assets                      | 225,000 | Total liabilities | 100,000 |
| Net worth                         | 125,000 |                   |         |

### Marking guidance

The question is fairly free in terms of what items students come up with and good answers will show realistic liabilities and assets for a household. Good answers explain the balance sheet in words.
