*Reconceptualizing STEM Education* Richard A. Duschl, Amber S. Bismack, 2016-01-08 Reconceptualizing STEM Education explores and maps out research and development ideas and issues around five central practice themes Systems Thinking Model Based Reasoning Quantitative Reasoning Equity Epistemic and Ethical Outcomes and STEM Communication and Outreach These themes are aligned with the comprehensive agenda for the reform of science and engineering education set out by the 2015 PISA Framework the US Next Generation Science Standards and the US National Research Council's A Framework for K 12 Science Education The new practice focused agenda has implications for the redesign of preK 12 education for alignment of curriculum instruction assessment STEM teacher education and professional development postsecondary further and graduate studies and out of school informal education In each section experts set out powerful ideas followed by two eminent discussant responses that both respond to and provoke additional ideas from the lead papers In the associated website highly distinguished nationally recognized STEM education scholars and policymakers engage in deep conversations and considerations addressing core practices that guide STEM education *Virtual Schooling* Elizabeth Kanna, Lisa Gillis, Christina Culver, 2009-06-09 Three top authorities offer their expertise and show parents how to ensure that their children optimize their skills and excel in learning in the online world *Business Periodicals Index*, 2001 Tapping Into the Power of Longitudinal Data Elizabeth Laird, 2008 The momentum behind building high quality data systems to harvest better information about student school and district performance has never been stronger To meet the goal of improving student achievement policymakers and educators need longitudinal data systems capable of providing timely valid and relevant data Although collecting better data is essential knowing how to analyze and apply this information is just as important With this knowledge and access to longitudinal data 1 Teachers can tailor instruction to help each student improve 2 Administrators can manage more effectively and efficiently and 3 Policymakers can evaluate which policy initiatives show the best evidence of increasing student achievement Although the immediate focus of the Data Quality Campaign DQC is to assist states in the development of quality longitudinal data systems the campaign's ultimate goal is to improve student achievement by promoting effective data use In this guide for school leaders the author looks at ways teachers and principals can use longitudinal data to meet students individual needs and improve performance This is part of a series of guides that demonstrate the power of longitudinal data for specific audiences To ensure relevance to teachers and principals the DQC worked with the National Association of Secondary School Principals NASSP to identify the most pressing questions facing school leaders today This guide for school leaders answers these questions with graphs and explanations based on simulated grades created from actual snapshot and longitudinal data from Texas as well as an example from a breakthrough high school in New York The DQC found a limited number of states that could answer questions based on longitudinal data a situation that underscores the need to continue investing in the development and use of these data systems including

providing professional development for educators on how to use longitudinal data Contains 10 footnotes and 6 figures

Shore, 2017 This case study focuses on methodological challenges to conducting an ecologically sound mixed methods longitudinal nonexperimental study of teaching Examining rich and complex environments is at the heart of research on teaching and learning We describe situational obstacles we had to overcome the search for valid and reliable measurements and challenges gathering multiple kinds of data e g surveys interviews and observations at multiple points in time Doing research in classrooms is challenging but rewarding and important we offer the reader practical advice for conducting such studies The specific case we cite began with a study of 244 senior preservice teachers self efficacy for inquiry and explored if and how self efficacy for inquiry enactment differed between elementary and secondary levels We then convened focus groups to identify what elements from teacher education and field experiences might explain their understanding of inquiry instruction We followed a sample of six of these teachers through their first year of professional practice as they struggled to implement inquiry in their classrooms We administered the same survey to assess preservice baseline self efficacy and then across the transition from student teacher to novice teacher We individually interviewed the six novice teachers at the beginning and at the end of the academic year to examine for changes in participants responses regarding their conceptualizations of inquiry and challenges they identified as obstacles to implementing inquiry We triangulated our data with five observations of each

of the six teachers during the year These multiple data sources divulged patterns among new teachers alignment of self efficacy conceptualizations and actual enactment of inquiry
