Resolving Classroom Management and School Leadership Issues in ELT David Prescott, 2011-07-12 This book builds on work commenced by the Higher Colleges of Technology HCT in the United Arab Emirates which nurtured a research culture and encouraged young professionals to evaluate practices in the workplace of teaching the classroom The current volume takes this further and features the work of mature and experienced teachers who use action research to examine problems and practices in a variety of situations through the prism of leadership and management The book features two introductory chapters The first highlights the importance of research for the academy and in particular for the academies of the United Arab Emirates The significance of research and publication for the development of quality in education is discussed Similarly the twin concerns of learning through investigation and the sharing of that learning through publication are emphasized Chapter Two gives background to action research and identifies

the small but growing body of work in this field in the United Arab Emirates The particular relevance of action research to leadership and management in English language teaching is discussed especially the learning capacity that this method of enquiry encompasses Chapters Three to Ten feature the work of the local researchers These chapters cover a variety of concerns which can be roughly grouped into management of classroom and teaching issues and broader educational leadership matters Classroom management issues include making group work more effective improving students out of class learning improving students personal responsibility and attendance patterns stimulating oral participation in class by students and improving student interactivity The broad leadership matters explore issues of time management understanding students and developing effective staff meetings The book concludes with a short chapter of reflection by the eight researcher authors written twelve months after the original action research investigations This section marks the book as special as retrospective evaluation is rare in education The chapter shows that the professional development engagement and enrichment which result from action research are empowering qualities

Jacobson,Richard M. Foxx,James A. Mulick,2005-01-15 One of the largest and most complex human services systems in Western nations has evolved to address the needs of people with developmental disabilities In the U S for example school budgets are stretched thin by legally mandated special education and billions of Medicaid dollars annually are consumed by residential and professional services to this population The temptation of a quick fix is strong Many parents desperately seek the latest ideas and place pressure on program administrators who often are not trained to think critically about the evidence base for intervention efforts The problems of people with developmental disabilities have historically been targeted by a wide range of professionals who rely on clinical experience and intuition and do not submit their claims to the tests of scientific research Professional entrepreneurs have energetically promoted their treatments to a public perhaps too trustful of those with credentials Thus families and their children are buffeted by reforms founded on belief and ideologically driven management Services fluctuate with the currents of social movements and rapidly shifting philosophies of care as policymakers and providers strive for increased responsiveness and individualization These forces affect not only where and how but how well people are served Too often services are less effective than they could be or worse damaging to personal

growth and quality of life Many treatments are based on poorly understood or even disproven approaches What approaches to early intervention education therapy and remediation really help those with mental retardation and developmental disabilities improve their functioning and adaptation And what approaches represent wastes of time effort and resources This book brings together leading behavioral scientists and practitioners to focus light on the major controversies surrounding these questions The authors review the origins perpetuation and resistance to scrutiny of questionable practices and offer a clear rationale for appraising the quality of services In an era of increasing accountability no one with a professional stake in services to individuals with mental retardation and developmental disabilities can afford not to read this book The Volta Review ,1913
