Matthew Fugate,Elizabeth Fogarty,2021-09-23 From the pages of Teaching for High Potential a quarterly publication of the National Association for Gifted Children this collection of articles is sure to be of use to any educator of high ability students Topics included range from instructional methods across all content areas including tips and tools for reading and vocabulary instruction integrating STEM content and engaging students in math to identification differentiation and addressing gifted students social emotional needs Articles also delve into current issues pertinent to the field of gifted education and this unique group of students including underachievement and underrepresented minority populations as well as new classroom strategies such as Makerspaces and teaching growth mindset This resource can be used to enhance a classroom lesson guide curriculum development or supplement professional development The featured articles are unique well written for the audience and selected by reviewers who understand what teachers need **Teachers Learning from Professional Development in Elementary Science** Andrew Hopkins Falk,2009 Formative assessment the assessment of student understanding to inform learning has been shown to be a teaching practice that has powerful positive effects on student learning Pedagogical content knowledge PCK teachers knowledge specific to teaching particular subject matter has been posited as an important resource for teachers engaging in formative assessment However no research has been conducted into the role of PCK in teachers formative assessment practice This study examined relationships between teachers formative assessment and pedagogical content knowledge in the context of a professional development program that engaged eleven elementary science teachers in analysis of samples of their students work related to electric circuits It investigated both the ways that teachers PCK contributed to their formative assessment practice as well as the opportunities created through formative assessment for teachers to build PCK Analyses showed that teachers both used and built pedagogical content knowledge through their engagement in formative assessment Teachers built knowledge of student understanding though interpretation of the student work and used that knowledge in subsequent interpretation The assessment tasks supplied by the PD and the corresponding student work provided evidence of a range of and patterns in student thinking In general teachers made productive use of the evidence available in the work and used multiple approaches to interpretation that created opportunities to build different kinds of PCK However when teachers were engaged in the task of interpreting larger sets of work in focused ways and constructing a rubric their approach to interpretation obscured the patterns available in the work and constrained their opportunities to build PCK Teachers used knowledge of the local curriculum and instructional strategies as they engaged in formative assessment knowledge derived from their own science learning experiences in the PD and their concurrent teaching practice Through their talk and collective analysis teachers co

constructed an orientation toward the nature of classroom science in which students were responsible for applying concepts provided by the teacher to appropriate situations. Patterns in teachers' talk about assessment were consistent with this orientation. There was also evidence that teachers' expressed PCK was consistent with this orientation. More often, however, teachers did not describe classroom practice to a level of detail that supported connections to a specific orientation. The findings provide support for proposals that PCK is an important resource for teachers' formative assessment practice as well as providing evidence that formative assessment represents an important opportunity for teachers to build PCK. Future research and professional development in this area needs to consider the role of material resources such as curriculum and assessment tools as well as the role of teachers' orientations to the nature of classroom science.

Current Trends and Legal Issues in Special Education David F. Bateman, Mitchell L. Yell, 2019-04-25 Building and supporting effective special education programs. School leaders and special educators are expected to be experts on all levels and types of special education law and services, types of disability and aspects of academic and functional programming. With the increasing demands of the job and the ever-changing legal and educational climate, many administrators and teachers are overwhelmed and few feel adequately prepared to meet the demands. *Trends and Legal Issues in Special Education* helps you build and support timely, legally sound and effective special education services and programs. Readers will find the most up-to-date information on how to effectively implement special education programs, processes and procedures, examination of a wide variety of issues from developing and implementing individual education programs (IEPs) that confer a free appropriate public education (Section 504) least restrictive environment (LRE) and successfully collaborating with parents to issues regarding accountability, staffing, bullying, early childhood special education, multi-tiered systems of support (MTSS), evidence-based practices, transition, discipline and the school-to-prison pipeline. Extensive references and resources. Written as a comprehensive reference for all who work with students with disabilities, this book offers the most up-to-date research and field-tested strategies from a range of experts that special education professionals can confidently and immediately apply.

Professional Learning Communities for Science Teaching Susan Mundry, Katherine E. Stiles, 2009 The volume begins with the argument that in a PLC environment teachers receive continuous professional development, therefore improving their teaching skills to the benefit of student learning. Later chapters recount the origins of schools as professional learning communities, define the characteristics of professional learning communities and review research on the subject.

Teachers and the Reform of Elementary Science Heidi Bulmahn Barker, 2000-09-01 This book explores the negotiation of the ways that teachers are involved in the process of changing curriculum and pedagogies and also the realities of implementing those changes in the classroom. How do teachers negotiate their place within changes in pedagogy and curriculum and how is that negotiation enacted in the space of a teacher's own classroom? This question is explored by telling stories about the process of change and the ways that teachers

were involved with science curricular and pedagogical reform efforts imposed in their particular school district Systemic School Improvement Interventions in South Africa Godwin Khosa, 2014-04-14 Looking at two smaller scale systemic school improvement projects implemented in selected district circuits in the North West and Eastern Cape by partnerships between government JET Education Services and private sector organisations this book captures and reflects on the experiences of the practitioners involved The Systemic School Improvement Model developed by JET to address an identified range of interconnected challenges at district school classroom and household level is made up of seven components In reflecting on what worked and what did not in the implementation of these different components the different chapters set out some of the practical lessons learnt which could be used to improve the design and implementation of similar education improvement projects Many of the lessons in this field that remain under recorded to date relate to the step by step processes followed the relationship dynamics encountered at different levels of the education system and the local realities confronting schools and districts in South Africa s rural areas Drawing on field data that is often not available to researchers the book endeavours to address this gap and record these lessons It is not intended to provide an academic review of the systemic school improvement projects It is presented rather to offer other development practitioners working to improve the quality of education in South African schools an understanding of some of the real practical and logistical challenges that arise and how these may be resolved to take further school improvement projects forward at a wider district provincial and national scale **ERIC Educational Documents Index, 1966-69: Major descriptors**, 1970 *Catalog of Copyright Entries.
