Advancing the Geography of Regions Martin Jones, Anssi Paasi, 2017-10-02 A key concern in the debate and empirical research on the geography of regions is the evolution of the conceptualizations and practical uses of the idea of region. This idea prioritises both the intellectual and the practical development of regional studies. This book drives the discussion further. It stresses the complex forms of agency advocacy involved in the production and reproduction of regional spaces and space of regionalism as well as the importance of geohistory and context. The book moves beyond the territorial relational divide that has characterized debates on regions and regional borders since the 1990s. The contributors answer key questions from different conceptual and concrete contextual angles and to motivate readers to reflect on the perpetual significance of regional concepts and how they are mobilized by various actors to maintain or transform the contested spatialities of societal power relations. This book was based on a special issue of *Regional Studies*. Geography: the Scientific Study of Human Settlement ...: Africa and Australasia Roy Edgardo Parry, 1927 *Advanced Geography for AQA Specification A* Ann Bowen, John Pallister, 2001 Written for the AQA geography specification A this text develops skills analysis in context through the use of map extracts and satellite data.
