Differential Equations on Complex Manifolds Boris Sternin,Victor Shatalov,2013-03-09 The present monograph is devoted to the complex theory of differential equations Not yet a handbook neither a simple collection of articles the book is a first attempt to present a more or less detailed exposition of a young but promising branch of mathematics that is the complex theory of partial differential equations Let us try to describe the framework of this theory First simple examples show that solutions of differential equations are as a rule ramifying analytic functions and hence are not regular near points of their ramification Second bearing in mind these important properties of solutions we shall try to describe the method solving our problem Surely one has first to consider differential equations with constant coefficients The apparatus solving such problems is well known in the real theory of differential equations this is the Fourier transformation Unfortunately such a transformation had not yet been constructed for complex analytic functions and the authors had to construct by themselves This transformation is of course the key notion of the whole theory *Ernst Zermelo - Collected Works/Gesammelte Werke II* Ernst Zermelo,2013-08-15 Ernst Zermelo 1871 1953 is regarded as the founder of axiomatic set theory and is best known for the first formulation of the axiom of choice However his papers also include pioneering work in applied mathematics and mathematical physics This edition of his collected papers consists of two volumes The present Volume II covers Ernst Zermelo s work on the calculus of variations applied mathematics and physics The papers are each presented in their original language together with an English translation the versions facing each other on opposite pages Each paper or coherent group of papers is preceded by an introductory note provided by an acknowledged expert in the field who comments on the historical background motivation accomplishments and influence Innovation, Communication and Engineering Teen-Hang Meen,Stephen Prior,Artde Donald Kin-Tak Lam,2013-10-08 This volume represents the proceedings of the 2013 International Conference on Innovation Communication and Engineering ICICE 2013 This conference was organized by the China University of Petroleum Huadong East China and the Taiwanese Institute of Knowledge Innovation and was held in Qingdao Shandong P R China October 26 November 1 2013 The conference received 653 submitted papers from 10 countries of which 214 papers were selected by the committees to be presented at ICICE 2013 The conference
