*The Womb and the Simile of the Woman in Labor in the Hebrew Bible* Karen Langton, 2024-10-30 This book explores figurative images of the womb and the simile of a woman in labor from the Hebrew Bible problematizing previous interpretations that present these as disparate images and showing how their interconnectivity embodies relationship with YHWH In the Hebrew Bible images of the womb and the pregnant body in labor do not co occur despite being grounded in an image of a whole pregnant female body the pregnant body is instead fragmented into these two constituent parts and scholars have continued to interpret these images separately with no discussion of their interconnectivity In this book Langton explores the relationship between these images inviting readers into a wider conversation on how the pregnant body functions as a means to an end a place to access and seek a relationship with YHWH Readers are challenged and asked to rethink how these images have been interpreted within feminist scholarship with womb imagery depicting YHWH s care for creation or performing the acts of a midwife and the pregnant body in labor as a depiction of crisis Langton explores select texts depicting these images focusing on the corporeal experience and discussing direct references and allusions to the physicality of a pregnant body within these texts This approach uncovers ancient and current androcentric ideology which dictates that conception gestation and birth must be controlled not by the female body but by YHWH *The Womb and the Simile of the Woman in Labor in the Hebrew Bible* is of interest to students and scholars working on the Hebrew Bible gender in the Bible and the Near East more broadly and

Miller II, OFS,2023-08-31 We approach Raphael s Agony in the Garden or Fra Angelico s Crucifixion for their beauty and not primarily to learn about fifteenth century fashion or even to decode the iconography Yet the many books on the Song of Songs whether they try to read the book as an ancient Near Eastern love song or a Christian allegory miss the main point of this book its aesthetic elements Aesthetics is the appreciation of beauty Aesthetics examines literary form as a response to content the way poetics works with contents the use of loaded semantic terms even the sound created by words and what cognitive science tells us it does to listeners This book uses the

commentary format to accompany an individual's reading of the Song of Songs focusing on these neglected aspects of the text. It both reads the book as it is meant to be read and opens up a new vista on this magnificent biblical text. *Musical Topics and Musical Performance* Julian Hellaby, 2023-01-31 The principal purpose of topics in musicology has been to identify meaning-bearing units within a musical composition that would have been understood by contemporary audiences and therefore also by later receivers albeit in a different context and with a need for historically aware listening. Since Leonard Ratner 1980 introduced the idea of topics his relatively simple ideas have been expanded and developed by a number of distinguished authors. Topic theory has now become a well-established branch of musicology often embracing semiotics but its relationship to performance has received less attention. *Musical Topics and Musical Performance* thus focuses on the interface of theory and practice and investigates how an appreciation of topical presence in a work may prompt interpretative thoughts for a potential performer as well as how performers have responded to such a presence in practice. The chapters focus on music from the nineteenth, twentieth and twenty-first centuries with case studies drawn from composers as diverse as Beethoven, Scriabin and Peter E. T. Using both scores and recordings the book presents a variety of original and innovative perspectives on the subject from a range of distinguished authors and addresses a neglected area of musicology and musical performance.

**Transgressive Heroism** Raymond Marks, 2024-10-07 Roman epic is traditionally understood to advance a masculine martial form of heroism. In his version of the Argonaut legend the *Argonautica* however Valerius Flaccus challenges that prevailing ethos of the genre by turning Medea, Jason's love interest in the story, into a heroic figure and Jason himself into her emasculated victim. The present study charts this plotline as it unfolds in the second half of Valerius' epic, finding its key source of inspiration in the poetry of Ovid with its tales of transgressive love, gender bending and unconventional heroism. Employing an extensive program of allusion to his *Metamorphoses* and elegiac works Valerius transforms Medea from the innocent vulnerable girl we see in her first appearance in the poem into a threatening powerful and masculine figure who not only helps Jason fulfill his quest for the golden fleece but eclipses him as hero in the process. Readers of this study will gain insight into Valerius' inventive reworking of the Argonaut myth and innovations within the epic genre as well as a greater appreciation for Ovid's influence on Roman epic poetry in the first century CE.

**Orphic Voice(s): A Narratological Commentary on Ovid's Metamorphoses 10.1-11.84** Julian Wagner, 2024-08-26 The book offers an in-depth narratological analysis of the Book of Orpheus 10.1-11.84 of Ovid's *Metamorphoses*. Starting from fundamental aspects of narrative like time, space and focalisation, the commentary highlights the polyphony of the various narrative levels. The complex and challenging design results from a constant oscillation between the narrator persona of Ovid and the programmatic Orpheus figure, which has found a wealth of interpretations. In addition, the study places the 10th book in the overall narrative framework of Ovid's

Metamorphoses with its density of intertextuality and metanarrativity      The Song of Songs Iain M. Duguid, 2015-02-13 Iain Duguid's Tyndale Old Testament Commentary explains how the Song of Songs is designed to show us an idealized picture of married love. It also convicts us of how far short of this perfection we fall both as humans and as lovers and drives us repeatedly into the arms of our true heavenly husband Jesus Christ      The Music Sound Nicolae Sfetcu, 2014-05-07 A guide for music compositions events forms genres groups history industry instruments language live music musicians songs musicology techniques terminology theory music video Music is a human activity which involves structured and audible sounds which is used for artistic or aesthetic entertainment or ceremonial purposes. The traditional or classical European aspects of music often listed are those elements given primacy in European influenced classical music: melody, harmony, rhythm, tone, color, timbre, and form. **Transforming Pedagogies Through Engagement with Learners, Teachers and Communities** Dat Bao, Thanh Pham, 2021-06-12 This book identifies three types of influential forces that pose challenges to innovations: socio-cultural dynamics, teacher individuality, and local circumstances. It uses languages, cultural traits, and intellectual heritages in the Asia Pacific region as an example to show the resistance to Western-based pedagogies due to disparities between the innovations and these local heritages. It reveals personal and professional values that teachers hold and how these values while seemingly supporting creative ideologies happen to prevent them from incorporating innovations in their practices. The book discusses how informal educational activities and services that a society possesses could impede pedagogical innovations. There is therefore a need for institutions and educators to develop a positive relationship between these phenomena and teaching innovations      *Conquered Conquerors* Danilo Verde, 2020-12-01 The first comprehensive study of the Song of Songs' use of military metaphors. Although love transcends historical and cultural boundaries, its conceptualizations, linguistic expressions, and literary representations vary from culture to culture. In this study, Danilo Verde examines love through the military imagery found throughout the Song's eight chapters. Verde approaches the military metaphors, similes, and scenes of the Song using cognitive metaphor theory to explore the overlooked representation of love as war. Additionally, this book investigates how the Song conceptualizes both the male and the female characters, showing that the concepts of masculinity and femininity are tightly interconnected in the poem. *Conquered Conquerors* provides fresh insights into the Song's figurative language and the conceptualization of gender in biblical literature      **Technological Animation in Classical Antiquity** Tatiana Bur, Maria Gerolemou, Isabel Ruffell, 2024-09-24 The persistent desire to animate inanimate objects has been a

recurring theme in European culture dating back to ancient Greek and Roman times Technological Animation in Classical Antiquity aims to establish for the first time the significance of this aspiration and its practical realization within Greek and Roman societies While certain aspects of this narrative have been explored previously this study shifts the focus to place technological animation at the forefront The sixteen chapters examine the tangible existence of such devices across various media and considers their roles in diverse contexts delving into the reciprocal relationship between technological and material realities and its influence on the concept of animation and vice versa By adopting this perspective technological animation not only provides a new understanding of the processes behind animation but also lends a fresh perspective to the animated artifact In contrast to other types of animation where the technologically animated artifact is often dismissed as a perceptual error induced for instance by rhetoric or magic this study separates technological animation from notions of rhetorical or magical skills theurgy or divine intervention Specifically it concentrates on a subset of artificial animation solely produced through technical procedures exploring how various motive forces actively contributed to giving objects agency and impacting their viewers illuminating how the material conditions of the artifacts themselves played a role in the process of technological animation whether through the distinctive materiality of bronze or the design of a statuette's hinge
