100 Top Picks for Homeschool Curriculum Cathy Duffy, 2005 A critical volume for the homeschooling community that helps parents make informed choices regarding learning styles and curriculum [American History: Teachers' Guide](#) Keystone View Company, 1925 *Teaching Numeracy* Margie Pearse, K. M. Walton, 2011-03-23 Do some of your students arrive at wildly wrong answers to mathematical problems but have no idea why? If so, they are not alone. Many students lack basic numeracy: the ability to think through the math logically, solve problems, and apply it outside of the classroom. This book outlines nine critical thinking habits that foster numerate learning and details practical ways to incorporate those habits into instruction. Referencing the new common core standards, NCTM standards, and established literacy practices, the authors include how to use this in my math class tomorrow, applications throughout the book which show you how to monitor and repair students' understanding. Guide students to recognize patterns, represent mathematics non-linguistically, encourage questioning for understanding, develop students' mathematics vocabulary, create a collaborative environment. Latter chapters show how to develop numeracy-rich lesson plans and provide several ready-to-use models with clear directions and student handouts. The book's practices, activities, and problems will help you move your students from simply doing the math to a deeper understanding of how to think through the math. **The Well-Trained Mind** Susan Wise Bauer, Jessie Wise, 2009-05-04 Outstanding should be on every home educator's reference bookshelf. *Homeschooling Today* This educational bestseller has dominated its field for the last decade, sparking a homeschooling movement that has only continued to grow. It will instruct you step by step on how to give your child an academically rigorous, comprehensive education from preschool through high school. Two veteran home educators outline the classical pattern of education, the trivium, which organizes learning around the maturing capacity of the child's mind. With this model, you will be able to instruct your child in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. Newly revised and updated, *The Well-Trained Mind* includes detailed book lists with complete ordering information, up-to-date listings of resources, publications, and Internet links, and useful contact information. [So You're Thinking About Homeschooling: Second Edition](#) Lisa Whelchel, 2009-02-19 Discover the Diversity of Homeschooling. Confused and intimidated by the complexities of homeschooling, many parents assume it could never work for them. Now, an updated edition of *So You're Thinking About Home Schooling* by Lisa Whelchel herself, a homeschooling mother of three, introduces to readers fifteen composite portraits of homeschooling families who show how every family can successfully face the unique challenges of its situation. The story-based approach deals with common questions of time management, teaching weaknesses, and outside responsibilities, as well as children's age variations, social and sports involvement, learning disabilities, and boredom. Seeing a wide variety of homeschooling families in action gives parents the information and confidence they need to make their own decisions about home-based education. Includes a new
