*Forged in War* R. David Lankes, 2021-05-15 I deal for readers seeking a more comprehensive look at information dissemination technology its context and its impact on the way in which we now live Library Journal Starred Review Many of what we think of as Information Age tools and media computers cell phones the internet encryption and more evolved directly out of modern warfare These tools started with World War I which began not with arms but with England cutting off underwater cables to Germany and isolating it accelerated through World War II and the Cold War and now play a center role in both declared and non declared conflicts like election interference and cyberbattles We buy phones and smart speakers because they are new and unlock great potential Voice assistants like Siri and Alexa help us do our work and answer that one piece of trivia that bugs us Yet these devices are data gatherers They collect repackage and monetize our questions purchases photographs web surfing to form a data industry now larger than the oil industry Well over 100 years

ago the data industry put in place a business model that trades our attention for news and entertainment That model has evolved into a complex art and science of message targeting and content ownership that has splintered communities while simultaneously concentrating media ownership to a few massive corporations Forged in War takes a critical look at the systems we use and how we ended up in a society that values data over personal liberty and commerce over the public good It tells a compelling and previously story of how our ideas of information and knowledge reflect the century of war that has militarized our worldview Author David Lankes s work has been funded by organizations such as The MacArthur Foundation The Institute for Library and Museum Services NASA The U S Department of Education The U S Department of Defense The National Science Foundation and The U S State Department This his latest book will help all of us learn how war has shaped our world and how to begin to create an agenda to stand down weaponized data and a media that seeks to own our personal even intimate data like one owns a gold mine

Media Production, Delivery and Interaction for Platform Independent Systems Oliver Schreer, Jean-François Macq, Omar Aziz Niamut, Javier Ruiz-Hidalgo, Ben Shirley, Georg Thallinger, Graham Thomas, 2013-12-06 Presents current trends and potential future developments by leading researchers in immersive media production delivery rendering and interaction The underlying audio and video processing technology that is discussed in the book relates to areas such as 3D object extraction audio event detection 3D sound rendering and face detection gesture analysis and tracking using video and depth information The book will give an insight into current trends and developments of future media production delivery and reproduction Consideration of the complete production processing and distribution chain will allow for a full picture to be presented to the reader Production developments covered will include integrated workflows developed by researchers and industry practitioners as well as capture of ultra high resolution panoramic video and 3D object based audio across a range of programme genres Distribution developments will include script based format agnostic network delivery to a full range of devices from large scale public panoramic displays with wavefield synthesis and ambisonic audio reproduction to small screen mobile devices Key developments at the consumer end of the chain apply to both passive and interactive viewing modes and will incorporate user interfaces such as gesture recognition and second screen devices to allow manipulation of the audio visual content Presents current trends and potential future developments by leading researchers in immersive media production delivery rendering and interaction Considers the complete production processing and distribution chain illustrating the dependencies and the relationship between different components Proposes that a format agnostic approach to the production and delivery of broadcast programmes will overcome the problems faced with the steadily growing number of production and delivery formats Explains the fundamentals of media production in addition to the complete production chain beyond current state of the art through to presenting novel approaches and technologies for future media production Focuses on the technologies that will allow for the realization of an E2E media platform that supports flexible content representations and interactivity for users An essential read for Researchers and

developers of audio visual technology in industry and academia such as engineers in broadcast technology companies and students working toward a career in the rapidly changing area of broadcast both from a production and an engineering perspective
