U S Navy Arctic Roadmap 2014 2030:

U.S. Navy Arctic Roadmap U. S. Department of the Navy, 2014-12-09 The United States is an Arctic nation through the state of Alaska and its surrounding territorial and Exclusive Economic Zone waters located in and around the Arctic Circle The United States Navy as the maritime component of the Department of Defense has global leadership responsibilities to provide ready forces for current operations and contingency response that include the Arctic Ocean The Arctic Region remains a challenging operating environment with a harsh climate vast distances and little infrastructure These issues coupled with limited operational experience are just a few substantial challenges the Navy will have to overcome in the Arctic Region While the Region is expected to remain a low threat security environment where nations resolve differences peacefully the Navy will be prepared to prevent conflict and ensure national interests are protected In the coming decades the Arctic Ocean will be increasingly accessible and more broadly used by Arctic and non Arctic nations seeking the Region s abundant resources and trade routes Due to the significant retreat of sea ice previously unreachable areas have started to open for maritime use several weeks each year The predicted rise in oil and gas development fishing tourism and mineral mining could alter the Region s strategic importance as Arctic and non Arctic nations make investments Despite this gradual ice opening the Region s frequent harsh weather and sea conditions are significant limiting factors for Arctic Ocean operations This update of the 2009 Navy Arctic Roadmap provides guidance necessary to prepare the Navy to respond effectively to future Arctic Region contingencies delineates the Navy s leadership role and articulates the Navy s support to achieve national priorities in the Region Navy functions in the Arctic Region are no different from those in other maritime regions however the Arctic Region environment makes the execution of many of these functions much more challenging In May 2013 President Obama published the National Strategy for the Arctic Region defining the desired end state as an Arctic Region stable and free of conflict where nations act responsibly in a spirit of trust and cooperation and where economic and energy resources are developed in a sustainable manner In November 2013 the Secretary of Defense published the Department of Defense Arctic Strategy identifying two supporting objectives to the National Strategy **The United States Navy Arctic Roadmap for 2014-2030** Navy Task Force Climate Change, 2014 This Roadmap an update of the 2009 Navy arctic roadmap provides direction to the Navy for the near term present 2020 mid term 2020 2030 and far term beyond 2030 placing particular emphasis on near term actions necessary to enhance Navy s ability to operate in the arctic region in the future In the near term there will be low demand for additional naval involvement in the region Current Navy capabilities are sufficient to meet near term operational needs The Navy will refine doctrine operating procedures tactics techniques and procedures to guide future potential operations in the arctic region In the mid term the Navy will provide support to the Combatant Commanders United States Coast Guard and other United States government agencies In the far term increased periods of ice free conditions could require the Navy to expand this support on a more routine basis

Throughout these timeframes the Navy will continue to develop and enhance cooperative relationships across the Department of Defense United States government agencies industry and international allies and partners

A Roadmap for U.S.-Russia Relations Andrey Kortunov, Olga Oliker, 2017-08-21 At a time of geopolitical tension and mutual distrust the United States and Russia must work together in those areas where coordination is critical to global security both to help stabilize the relationship and to buffer against conflict in the future The analyses in this volume examine prospects for Russia U S cooperation in several crucial regions and fields economics energy the Arctic Euro Atlantic security the Middle East strategic stability cybersecurity and countering terrorism and extremism They offer concrete actionable recommendations in each area

Security and Sovereignty in the North Atlantic L. Heininen, 2014-11-21 The

North Atlantic continues to be an area of international strategic significance regionally and globally This study explores the strong processes of sovereignty as well as new independent states and micro proto states that are forming in the region

Science, Technology, and New Challenges to Ocean Law Harry N. Scheiber,James Kraska,Moon-Sang

Kwon,2015-08-25 Science Technology and New Challenges to Ocean Law offers fresh perspectives on a set of vital issues in the field of ocean law and policy Since the early period of the industrial revolution successive waves of revolutionary scientific discoveries and technological innovations have intensified the global population s exploitation of ocean and coastal resources In this volume several leading authorities in the field address major dimensions of the interface of science technology and ocean law both historically and in current day perspective and emergent challenges in legal ordering of ocean uses for sustainability and equitability Among the topics that are analysed in these readable accessible papers are ecosystem approaches to resource management the historic interplay of science and military concerns the place of science in dispute settlement processes the varied human uses of the seabed the roles in ocean governance of indigenous peoples legal issues in fisheries management and conservation and special regional problems of the Arctic the Bering Strait the South China Sea and the eastern Mediterranean The urgent importance of the subjects addressed here together with the variety of disciplinary approaches deployed by the authors enhance the value of this book s unique contribution to the literature of ocean studies

The End of Grand Strategy Simon Reich,Peter Dombrowski,2018-01-15 In The End of Grand Strategy Simon Reich and Peter Dombrowski challenge the common view of grand strategy as unitary They eschew prescription of any one specific approach chosen from a spectrum that stretches from global primacy to restraint and isolationism in favor of describing what America s military actually does day to day They argue that a series of fundamental recent changes in the global system the inevitable jostling of bureaucratic politics and the practical limitations of field operations combine to ensure that each presidential administration inevitably resorts to a variety of strategies Proponents of different American grand strategies have historically focused on the pivotal role of the Navy In response Reich and Dombrowski examine six major maritime operations each of which reflects one major strategy One size does not fit all say the authors the attempt to impose a single overarching blueprint is no longer feasible Reich and Dombrowski declare that grand strategy as we know it is dead The End of Grand Strategy is essential reading for policymakers military strategists and analysts and critics at advocacy groups and think tanks

Baseline of Russian Arctic Laws Paul Arthur Berkman,Alexander N. Vylegzhanin,Oran R. Young,2019-03-30 This book is the first comprehensive and authoritative translation into English of national and international laws of Russia that relate to the Arctic from the early 19th century to the present revealing the historical and current context of sovereignty sovereign rights and jurisdiction across nearly half of the north polar region The Russian original version was coordinated by Igor Sergeyevich Ivanov former Foreign Minister of the Russian Federation and currently the President of the Russian International Affairs Council This unique translation complements all legal geopolitical and

governance analyses of the Arctic as a primary source of information without interpretation or bias The Baseline of Russian Arctic Laws is a treasure trove for diplomats scholars and students who are involved with the international environmental economic and societal dynamics of the Arctic balancing national interests and common interests to achieve sustainability of the high north for the benefit of all across generations in our globally interconnected civilization *Spatial Impacts of Climate Change* Denis Mercier, 2021-05-11 Climate change has been a central concern over recent years with visible and highly publicized consequences such as melting Arctic ice and mountain glaciers rising sea levels and the submersion of low lying coastal areas during mid latitude and tropical cyclones This book presents a review of the spatial impacts of contemporary climate change with a focus on a systematic multi scalar approach Beyond the facts rises in temperature changes in the spatial distribution of precipitation melting of the marine and terrestrial cryosphere changes in hydrological regimes at high and medium latitudes etc it also analyzes the geopolitical consequences in the Arctic and Central Asia changes to Mediterranean culture and to viticulture on a global scale as well as impacts on the distribution of life for example in the Amazon rainforest in large biomes on a global scale and for birds **Asia-Pacific Rebalance 2025** Michael Green, Kathleen Hicks, Mark F. Cancian, 2016-02-04 In 2015 Congress tasked the Department of Defense to commission an independent assessment of U S military strategy and force posture in the Asia Pacific as well as that of U S allies and partners over the next decade This CSIS study fulfills that congressional requirement The authors assess U S progress to date and recommend initiatives necessary to protect U S interests in the Pacific Command area of responsibility through 2025 Four lines of effort are highlighted 1 Washington needs to continue aligning Asia strategy within the U S government and with allies and partners 2 U S leaders should accelerate efforts to strengthen ally and partner capability capacity resilience and interoperability 3 the United States should sustain and expand U S military presence in the Asia Pacific region and 4 the United States should accelerate development of innovative capabilities and concepts for U S forces **Russia in the Arctic** Alexander Sergunin, 2015-12-15 In this timely book the authors provide a detailed analysis of Russia s national interests in the Arctic region They assess Russia s domestic discourse on the High North s role in the system of national priorities as well as of Moscow s bi and multilateral relations with major regional players energy environmental socio cultural and military policies in the Arctic In contrast to the internationally wide spread stereotype of Russia as a revisionist power in the High North this book argues that Moscow tries to pursue a double sided strategy in the region On the one hand Russia aims at defending her legitimate economic interests in the region On the other hand Moscow is open to co operation with foreign partners that are willing to partake in exploiting the Arctic natural resources The general conclusion is that in the foreseeable future Moscow s strategy in the region will be predictable and pragmatic rather than aggressive or spontaneous The authors argue that in order to consolidate the soft power pattern of Russia s behavior a proper international environment in the Arctic should be created by common efforts Other regional players should demonstrate their responsibility and

willingness to solve existing and potential problems on the basis of international law *NATO, Climate Change, and International Security* Tyler H. Lippert, 2019-05-11 This book offers a prospective analysis of the anticipated security consequences of climate change in relation to the North Atlantic Treaty Organization NATO Using climate and security literature to complement recent foresight and scenario analysis developed by NATO the author applies the International Risk Governance Council's IRGC Risk Governance Framework to identify the considerations and actions that could assist NATO in a context where climate and environmental factors more intensively shape security Tyler Lippert explores how climate change has the potential to increase the need for humanitarian assistance and disaster response to create tension over shared resources to renew and enhance geo political interest in the Arctic and to deepen concern with respect to the Middle East and North Africa MENA Within this new political and environmental reality NATO must consider how to adapt to meet new demands prepare for new security challenges as well as manage unforeseen consequences Offering a corrective this book identifies near term actions for NATO to improve its risk governance posture providing a basis upon which longer range policy considerations can be developed This analysis is only the opening salvo of what is likely to be a complicated process that spans many years if not decades However in mapping the risk governance dimensions to the security and climate nexus from the perspective of NATO Lippert provides a foundation for risk based policy planning for NATO The book will be of immense value to policy and decision makers NATO leadership and its affiliated organizations as well as to academics across a broad span of subject areas particularly environmental sociology defense and foreign policy and the political sciences

Next Generation Earth System Prediction National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Ocean Studies Board, Board on Atmospheric Sciences and Climate, Committee on Developing a U.S. Research Agenda to Advance Subseasonal to Seasonal Forecasting, 2016-07-22 As the nation's economic activities security concerns and stewardship of natural resources become increasingly complex and globally interrelated they become ever more sensitive to adverse impacts from weather climate and other natural phenomena For several decades forecasts with lead times of a few days for weather and other environmental phenomena have yielded valuable information to improve decision making across all sectors of society Developing the capability to forecast environmental conditions and disruptive events several weeks and months in advance could dramatically increase the value and benefit of environmental predictions saving lives protecting property increasing economic vitality protecting the environment and informing policy choices Over the past decade the ability to forecast weather and climate conditions on subseasonal to seasonal S2S timescales i.e. two to fifty two weeks in advance has improved substantially Although significant progress has been made much work remains to make S2S predictions skillful enough as well as optimally tailored and communicated to enable widespread use Next Generation Earth System Predictions presents a ten year U.S. research agenda that increases the nation's S2S research and modeling capability advances S2S forecasting and aids in decision making at medium and extended lead times

Geopolitics and Maritime Security Frank Bekkers, Patrick Bolder, Esther Chavannes, Willem Oosterveld, Rob de Wijk, Jan Frederik Braun, 2019-06-28 This report contains the results from a research project aimed at identifying new capabilities for the future Royal Netherlands Navy RNLN With the type of naval operations and tasks for the period up to 2030 35 largely enduring the current regional power projection profile of the Royal Netherlands Navy RNLN must be strengthened and renewed We envisage the core of the future naval force to remain a versatile mix of surface and sub surface combatants shipborne helicopters and unmanned systems for intelligence purposes and extended force projection modern amphibious forces and long range land attack capability to counter Anti Access and Area Denial A2AD threats All main vessels should be ocean going able to navigate the main operating theaters in the European seas and the Carib under all conditions But even while we expect that naval operations and tasks as well as the overall force profile of the RNLN will evolve rather than drastically change the RNLN must substantially innovate but not beyond recognition its personnel materiel doctrines and processes organization and structures

Routledge Handbook of Arctic Security Gunhild Hoogensen Gjørsv, Marc Lanteigne, Horatio Sam-Aggrey, 2020-01-09 The Routledge Handbook of Arctic Security offers a comprehensive examination of security in the region encompassing both state based and militarized notions of security as well as broader security perspectives reflecting debates about changes in climate environment economies and societies Since the turn of the century the Arctic has increasingly been in the global spotlight resulting in the often invoked idea of Arctic exceptionalism being questioned At the same time the unconventional political power which the Arctic s Indigenous peoples hold calls into question conventional ideas about geopolitics and security This handbook examines security in this region revealing contestations and complementarities between narrower state based and or militarized notions of security and broader security perspectives reflecting concerns and debates about changes in climate environment economies and societies The volume is split into five thematic parts Theorizing Arctic Security The Arctic Powers Security in the Arctic through Governance Non Arctic States Regional and International Organizations People States and Security This book will be of great interest to students of Arctic politics global governance geography security studies and International Relations

Handbook on Climate Change and International Security Maria J. Trombetta, 2023-12-11 This topical Handbook explores the emergence of climate change as an international security issue the threats it poses and the political and academic debates it has prompted Framing climate change as a security issue it explores the ways relevant actors states and international organizations have conceptualized climate security and its associated threats

Governing the North American Arctic Dawn Alexandra Berry, Nigel Bowles, Halbert Jones, 2016-04-08 Though it has been home for centuries to indigenous peoples who have mastered its conditions the Arctic has historically proven to be a difficult region for governments to administer Extreme temperatures vast distances and widely dispersed patterns of settlement have made it impossible for bureaucracies based in far off capitals to erect and maintain the kind of infrastructure and institutions that

they have built elsewhere As climate change transforms the polar regions this book seeks to explore how the challenges of governance are developing and being met in Alaska the Canadian Far North and Greenland while also drawing upon lessons from the region s past Though the experience of each of these jurisdictions is unique their place within democratic federal systems and the prominence within each of them of issues relating to the rights of indigenous peoples situates them as part of an identifiably North American Arctic Today as this volume shows their institutions are evolving to address contemporary issues of security environmental protection indigenous rights and economic development
