Alfred, Nathan Harris, Kathryn Thirolf, James

Webb,2012-06-18 Understanding performance requires asking fundamental questions about the nature and purpose of an organization What is its business Whom does it serve What do stakeholders want and expect What do they get How does the organization conceive of and measure results How do stakeholders feel about results the organization is generating Answers to these questions require a framework for analysis comprised of three essential ingredients stakeholders results and improvement strategies Organizational performance is given segmental treatment in literature and research Numerous articles and books have been written on related topics such as outcomes assessment organizational effectiveness and cost benefit analysis but each approaches the subject from a singular perspective In this book organizational performance is viewed through multiple lenses so that its different dimensions can be understood and appreciated The view is broad and far reaching in the beginning and specific toward the end where actions organizations can take to improve performance are described Recognizing that performance is context specific colleges and universities are used in this book as the medium for examining performance This book is written for current and future leaders in profit and non profit organizations who find scholarly books unimaginative protracted and detached from practice Senior executives while familiar with many of the basic concepts will find exceptions to current conceptions of organizational performance and practices used to measure and report performance Performance The Dynamic of Results in Postsecondary Organizations will be particularly useful to college and university administrators corporate executives and managers managers in non profit policy making and advocacy organizations graduate program faculty and students and management consulting organizations **Theater Careers** Tim Donahue,Jim Patterson,2013-07-22 Theater Careers is designed to empower aspiring theater professionals to make savvy informed decisions through a concise overview of how to prepare for and find work in the theater business Tim Donahue and Jim Patterson offer well researched information on various professions salary ranges educational and experience requirements and other facets certain to enlighten students contemplating a theater career as well as inform counselors teachers and parents of available opportunities and the demands of each path Theater Careers offers valuable details not readily available elsewhere including Dozens of informative job descriptions surveying the impressive variety of theater careers both on and off the stage Statistics on the working and earning prospects of various careers as drawn from the best sources in the business Thoughtful assessments of the value of education and training choices including the most meaningful way to look at the costs of college estimating net costs which is seldom described elsewhere and how to choose a school Straightforward and objective Theater Careers is an ideal reference for those seeking careers in the theater Armed with this information readers will be better equipped to pursue choices that best lead to satisfying and secure employment in the rewarding field of the dramatic arts *Breaking Ranks* Colin Diver,2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers

among America's colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality

Andy Gillentine, Robert Baker, Jacquelyn Cuneen, 2017-09-29 This collection of essays written by a number of respected sport management scholars addresses many of the challenges and issues facing today's sport management academic programs. It is intended to begin a professional and scholarly discussion to identify the best or at least the most logical paths to follow for sport management programs and the industry with which they are so closely aligned. Contributors invited to participate based on their recognized areas of expertise address specific topics using their own unique voices and writing styles. In the ebook version, essays link to video introductions by the authors and to online discussion forums where readers can respond to the issues presented in the essays. From the Preface: The field of sport management stands at an academic crossroads; the essays in this book address the following and other emerging questions: Should our successful field of study continue to model other disciplines and perpetuate their successes as well as their shortcomings, or should we determine our own specific model for academic success? How are we doing in preparing future sport managers to perform in the industry and on the global stage? Where do we belong in the scheme of academe? The book's goal is to generate discussion among sport management professors, industry professionals who serve as adjunct faculty and participate on sport management program advisory boards, doctoral students who intend to teach in sport management programs, and others who explore and critique higher education in general.

Place, Not Race Sheryll Cashin, 2014-05-06 From a nationally recognized expert, a fresh and original argument for bettering affirmative action. Race-based affirmative action had been declining as a factor in university admissions even before the recent spate of related cases arrived at the Supreme Court. Since Ward Connerly kickstarted a state-by-state political mobilization against affirmative action in the mid-1990s, the percentage of four-year public colleges that consider racial or ethnic status in admissions has fallen from 60 percent to 35 percent. Only 45 percent of private colleges still explicitly consider race, with elite schools more likely to do so, although they too have retreated. For law professor and civil rights activist Sheryll Cashin, this isn't entirely bad news because, as she argues, affirmative action as currently practiced does little to help disadvantaged people. The truly disadvantaged—black and brown children trapped in high-poverty environs—are not getting the quality schooling they need in part because backlash and wedge politics undermine any possibility for common-sense public policies. Using place instead of race in diversity programming, she writes, will better amend the structural disadvantages endured by many children of color while enhancing the possibility that we might one day move past the racial resentment that affirmative action engenders. In *Place, Not Race*, Cashin reimagines affirmative action and champions place-based policies, arguing that college applicants who have thrived despite exposure to neighborhood or school poverty are deserving of special consideration. Those blessed to have come of age in poverty-free havens are not. Sixty years since the historic decision, we're undoubtedly far from meeting the promise of *Brown v. Board of Education*, but Cashin offers a new framework for true inclusion for the millions of children who live separate and unequal lives. Her proposals include making standardized tests optional, replacing merit-based financial aid with need-based financial aid, and recruiting

high achieving students from overlooked places among other steps that encourage cross racial alliances and social mobility A call for action toward the long overdue promise of equality Place Not Race persuasively shows how the social costs of racial preferences actually outweigh any of the marginal benefits when effective race neutral alternatives are available
