Making Time Yulia Frumer,2018-01-19 What is time made of We might balk at such a question and reply that time is not made of anything it is an abstract and universal phenomenon In *Making Time* Yulia Frumer upends this assumption using changes in the conceptualization of time in Japan to show that humans perceive time as constructed and concrete In the mid sixteenth century when the first mechanical clocks arrived in Japan from Europe the Japanese found them interesting but useless because they failed to display time in units that changed their length with the seasons as was customary in Japan at the time In 1873 however the Japanese government adopted the Western equal hour system as well as Western clocks Given that Japan carried out this reform during a period of rapid industrial development it would be easy to assume that time consciousness is inherent to the equal hour system and a modern lifestyle but *Making Time* suggests that punctuality and time consciousness are equally possible in a society regulated by a variable hour system arguing that this reform occurred because the equal hour system better reflected a new conception of time as abstract and universal which had been developed in Japan by a narrow circle of astronomers who began seeing time differently as a result of their measurement and calculation practices Over the course of a few short decades this new way of conceptualizing time spread gradually becoming the only recognized way of treating time Solutions to Problems of Race, Class, and Gender Vernon McClean,Lois

Lyles,1993 The International Encyclopaedic Dictionary ... ,1901 **TT.** ,1967 Translations of scientific and technical monographs and articles The Aging Consumer Aimee Drolet,Carolyn Yoon,2011-01-11 At present about 45 million Americans are over the age of 65 and by 2020 one out of every six Americans will be 65 or older These statistics are reflective of a worldwide phenomenon in developing and developed countries alike unrivalled since the Industrial Revolution This edited volume written by experts in many fields examines the economic and psychological research on how aging consumers behave make decisions and choose in the marketplace The book takes stock of what is known identifies gaps and open questions and outlines an agenda for future research It covers topics from the individual to the societal level of analysis

The Politics of Self-Determination Volker Prott,2016-09-08 *The Politics of Self Determination* examines the territorial restructuring of Europe between 1917 and 1923 when a radically new and highly fragile peace order was established It opens with an exploration of the peace planning efforts of Great Britain France and the United States in the final phase of the First World War It then provides an in depth view on the practice of Allied border drawing at the Paris Peace Conference of 1919 focussing on a new factor in foreign policymaking academic experts employed by the three Allied states to aid in peace

planning and border drawing This examination of the international level is juxtaposed with two case studies of disputed regions where the newly drawn borders caused ethnic violence albeit with different results the return of Alsace Lorraine to France in 1918 19 and the Greek Turkish War between 1919 and 1922 A final chapter investigates the approach of the League of Nations to territorial revisionism and minority rights thereby assessing the chances and dangers of the Paris peace order over the course of the 1920s and 1930s Volker Prott argues that at both the international and the local levels the temptation of violence drove key actors to simplify the acclaimed principle of national self determination and use ethnic definitions of national identity While the Allies thus hoped to avoid uncomfortable decisions and painstaking efforts to establish an elusive popular will local elites administrations and paramilitary leaders soon used ethnic notions of identity to mobilise popular support under the guise of international legitimacy Henceforth national self determination ceased to be a tool of peace making and instead became an ideology of violent resistance

Ransomware Analysis Claudia Lanza, Abdelkader Lahmadi, Jérôme François, 2024-11-13 This book presents the development of a classification scheme to organize and represent ransomware threat knowledge through the implementation of an innovative methodology centered around the semantic annotation of domain specific source documentation By combining principles from computer science document management and semantic data processing the research establishes an innovative framework to organize ransomware data extracted from specialized source texts in a systematic classification

system Through detailed chapters the book explores the process of applying semantic annotation to a specialized corpus comprising CVE prose descriptions linked to known ransomware threats This approach not only organizes but also deeply analyzes these descriptions uncovering patterns and vulnerabilities within ransomware operations The book presents a pioneering methodology that integrates CVE descriptions with ATT CK frameworks significantly refining the granularity of threat intelligence The insights gained from a pattern based analysis of vulnerability related documentation are structured into a hierarchical model within an ontology framework enhancing the capability for predictive operations This model prepares cybersecurity professionals to anticipate and mitigate risks associated with new vulnerabilities as they are cataloged in the CVE list by identifying recurrent characteristics tied to specific ransomware and related vulnerabilities With real world examples this book empowers its readers to implement these methodologies in their environments leading to improved prediction and prevention strategies in the face of growing ransomware challenges A History of the Peace
