The Dream Police - English version Alessandro Giudice, 2017-12-28 Almost certainly the content of the following specification is something already well known therefore it may seem superfluous here nevertheless we prefer to propose it just the same During the length of this story we will neglect the obvious definition regarding what is commonly considered as an act of conscious will We d rather observe that by act of unconscious will we mean an act performed according to the will of which the person who acts is not conscious therefore that act is the result of an unconscious will pulsion Instead by involuntary act we mean an act performed without any conscious or unconscious will by the person who acts for example it s the case of those acts belonging to circumstances such as unexpectedly meeting someone something while you re walking that meeting does not depend on the conscious or unconscious will of the person About all that this is not the adequate place to deal with either supernal will or coincidence the latter not to be interpreted as a casualness but literary as the event of coinciding as synchronicity according to the undersigned The dream and the acts it contains here represent a matter on their own You can conceptualize as you please the distinction among a nihilist a dissident a dissentient and a subversive according to the power system described in this story the latter two could be considered as interconnected for precautionary measures You can imagine as you please the complexions and the jobs of the characters in this story The Author **Cannabis World**

Help Us Think Nancy Salay,2025-02-06 A capacity to act for reasons is a key indicator of intelligence A leaf floats this way and that as the wind currents shift a drone moves up or down with the movements of its controller but a cognitive agent decides to walk to the store to get some food This deliberative capacity to think through hypothetical situations to choose between the grocery store or the restaurant requires representational intentionality the ability to think about real and possible situations in the world According to the mainstream zeitgeist in the cognitive sciences this capacity exhaustively reduces to lower level processes and as a consequence cognitive research has been driven increasingly inwards and downwards to focus on activity at the neural and molecular levels Here Nancy Salay argues that this move is deeply misguided After revealing the central problems with this internalist idea Salay puts forward an externalist paradigm of intentionality supported by recent empirical work in neuroscience computer science philosophy animal cognition and developmental psychology Drawing all of these insights together she provides a unified framework in which to situate externalist views of intentionality making progress towards a viable theory of cognition This is a comprehensive theoretical guide and a valuable empirical resource for those who view cognition through an extended and enactive lens **NLT**
