Tut Opening Date For Application For 2015:

Eurasia 2.0 Mark Bassin, Mikhail Suslov, 2016-03-17 This book discusses the return of geopolitical ideas and doctrines to the post Soviet space with special focus on the new phenomenon of digital geopolitics which is an overarching term for different political practices including dissemination of geopolitical ideas online using the internet by political figures and diplomats for legitimization and outreach activity and viral spread of geopolitical memes Different chapters explore the new possibilities and threats associated with this digitalization of geopolitical knowledge and practice Our authors consider new spatial sensibilities and new identities of global as well as local Selves the emergence of which is facilitated by the internet They explore recent reconfigurations of the traditional imperial conundrum of center versus periphery Developing Manuel Castells argument that social activism in the digital era is organized around cultural values the essays discuss new geopolitical ideologies which aim to reinforce Russia's spiritual sovereignty as a unique civilization while at the same time seeking to rebrand Russia as a greater soft power by utilizing the Russian speaking diaspora or employing traditionalist rhetoric Great Power imagery enemy making and visual mappings of Russia's future territorial expansion are traditional means for the manipulation of imperial pleasures and geopolitical fears In the age of new media however this is being done with greater subtlety by mobilizing the grassroots contracting private information channels and depoliticizing geopolitics Given the political events of recent years it is logical that the Ukrainian crisis should provide the thematic backdrop for most of the authors

Tutankhamun and Carter Rogerio Sousa, Gabriele Pieke, Tine Bagh, 2024-08-15 First scholarly multi disciplinary re assessment of Howard Carter s discovery and excavation of Tutankhamun s tomb and the impact of the find on our understanding of the material culture of Ancient Egypt The discovery of the tomb of Tutankhamun in 1922 stands out as one of the most important finds of modern archaeology revealing an enormous wealth of objects

encapsulating techniques vestiges of uses and re uses of materials as well as unrivalled clues regarding the complex set of beliefs associated with the pharaonic funerary material culture Once cleared from the tomb these objects have captivated the world with their irresistible charm and beauty ending up playing a role in contemporary popular culture However it seems that such magnetism rather hindered than facilitated the scholarly study of the find One hundred years after the discovery of this magnificent tomb most of its objects remain insufficiently studied to this day This volume aims to show how it remains challenging to study Tutankhamun s objects gathering a collection of studies authored by leading scholars on conservation materials funerary beliefs as well as the reception of motifs and the impact of the discovery Through these studies it becomes clear how ancient objects can help us reconstruct the complex fabric of the ancient Egyptian society and how they keep interacting with modern audiences

Self-Assembled Organic-Inorganic Nanostructures Christian von Borczyskowski, Eduard Zenkevich, 2017-03-27 The current state and perspectives in natural and life sciences are strongly linked to the development of novel complex organic

inorganic materials at various levels of organization including semiconductor quantum dots QDs and QD based nanostructures with unique optical and physico chemical properties This book provides a comprehensive description of the morphology and main physico chemical properties of self assembled inorganic dye nanostructures as well as some applications in the field of nanotechnology It crosses disciplines to examine essential nanoassembly principles of QD interaction with organic molecules excited state dynamics in nanoobjects theoretical models and methodologies Based on ensemble and single nanoobject detection the book quantitatively shows for the first time on a series of nanoassemblies that surface mediated processes formation of trap states dictate the probability of several of the most interesting and potentially useful photophysical phenomena FRET or non FRET induced quenching of QD photoluminescence observed for colloidal QDs and QD dye nanoassemblies Further nanostructures can be generated by nanolithography and thereafter selectively decorated with dye molecules A similar approach applies to natural nanosized surface heterogeneities

The Authoritarian International Stephen G. F. Hall, 2023-05-25

Stephen Hall argues that democracies can preserve their norms and values from increasing attacks and backsliding by better understanding how authoritarian regimes learn He focuses on the post Soviet region investigating two established authoritarian regimes Belarus and Russia and two hybrid regimes Moldova and Ukraine with the aim of explaining the concept of authoritarian learning and revealing the practices that are developed and the sources of that learning Hall finds clear signs of collaboration between countries in developing best survival practices between authoritarian minded elites and demonstrates that learning does not just occur between states rather it can happen at the intra state level with elites learning lessons from previous regimes in their own countries He highlights the horizontal nature of this learning with authoritarian minded elites developing methods from a range of sources to ascertain the best practices for survival Post Soviet regional organisations are crucial for the development and sharing of these survival practices as they provide learning rooms and training exercises

Treasured Christina Riggs, 2022-02-01 A bold new history of the discovery of King Tut and the seismic impact it left on modern society When it was discovered in 1922 in an Egypt newly independent of the British Empire the 3 300 year old tomb of Tutankhamun sent shockwaves around the world The boy king became a household name overnight and kickstarted an international obsession that continues to this day From pop culture and politics to tourism and the heritage industry it s impossible to imagine the past century without the discovery of Tutankhamun yet so much of the story remains untold In Treasured Christina Riggs weaves compelling historical analysis with tales of lives touched or changed forever by an encounter with the boy king Who remembers that Jacqueline Kennedy first welcomed the young pharaoh to America That a Tutankhamun revival in the 1960s helped save the ancient temples of Egyptian Nubia Or that the British Museum s landmark Tutankhamun exhibition in 1972 remains its most successful ever But not everything about King

Tut glitters tours of his treasures in the 1970s were linked to Big Oil his mummified remains have been exploited in the name of science and accounts of his tomb's discovery exclude Egyptian archaeologists Treasured offers a bold new history of the young pharaoh who has as much to tell us about our world as his own

Oromo Indigenous Religion and Oromo Christianity Ujulu Tesso Benti, 2018-05-31 The early non Oromo writers have distorted the history of the Oromo Without scientific research they were speaking of the so called Oromo migration of the 16th century Against the unscientific thesis of the early scholars this work confirmed the Oromo to be not only the indigenous African peoples but also belong to the Cushitic Africans who invented the first world civilization Their egalitarian and holistic culture the gadaa system is part of the ancient Cushitic civilization It is the base for modern democratic system of governance The root word of gadaa is originated from Ka the creator God of the ancient religion of the Cushitic Africans From this very name Ka originated the Oromo word Waaqa which also means creator of everything This shows that the Oromo are among the first nations who came up with the idea of monotheism Therefore this work disqualifies the missionary assumptions describing the Oromo Indigenous Religion OIR as Satanism and its religious experts the Qaalluus as witchdoctors or sorcerers This dissertation discovered many identical similar partial similar and few differing elements between the Oromo Indigenous Religion OIR and Oromo Christianity OC Also the study identified many Oromo cultural elements that are compatible to Christianity therefore must be adopted by the Oromo Christianity According modern scholarship God revealed himself in every human culture and religion is part of human culture Therefore no religion can claim to be the only true religion Based on this principle this dissertation calls all leaders of religious institutions in Oromia to change their attitude develop culture of tolerance conduct constructive religious dialogue create the atmosphere of peaceful coexistence of all religions and establish sustainable peace that serves humanity
