contribution of Turow's book in addition to providing a highly readable and smart overview of medical shows over the years is to examine the consequences of the gap between the reality of medical care and the often romanticized heroic depictions on television. This would be a very good book for professors to use in teaching a range of courses in communications studies from introductory courses to more specialized classes on health and the media.

Playing Doctor is an engaging and highly perceptive history of the medical TV series from its inception to the present day. Turow offers an inside look at the creation of iconic doctor shows as well as a detailed history of the programs, an analysis of changing public perceptions of doctors and medicine, and an insightful commentary on how medical dramas have both exploited and shaped these perceptions. Drawing on extensive interviews with creators, directors, and producers, *Playing Doctor* is a classic in the field of communications studies. This expanded edition includes a new introduction placing the book in the contemporary context of the health care crisis as well as new chapters covering the intervening twenty years of television programming. Turow uses recent research and interviews with principals in contemporary television doctor shows such as *ER*, *Grey's Anatomy*, *House*, and *Scrubs* to illuminate the extraordinary ongoing cultural influence of medical shows. *Playing Doctor* situates the television vision of medicine as a limitless high-tech resource against the realities underlying the health care debate both yesterday and today.

Joseph Turow is Robert Lewis Shayon Professor at the Annenberg School for Communication, University of Pennsylvania. He was named a Distinguished Scholar by the National Communication Association and a Fellow of the International Communication Association in 2010. He has authored eight books, edited five, and written more than 100 articles on mass media industries. He has also produced a DVD titled *Prime Time Doctors: Why Should You Care?* that has been distributed to all first-year medical students with the support of the Robert Wood Johnson Foundation. Praise for the first edition of *Playing Doctor*: "With *Playing Doctor*, Joseph Turow has established himself as one of the foremost analytic historians of the interplay between television, its audiences, and other American institutions." George Comstock, S.I. Newhouse Professor at the Newhouse School of Public Communications, Syracuse University.

The Use and Abuse of Television. J. Mallory Wober, 2013-06-19. A critical review of the harms and benefits of television that also examines systems for maximizing television's benefits. The author breaks away from the conventional jargon of audience measurement and other traditional research methods, proposing instead new and alternative European and Australian methods of evaluating programming. Typical characterizations of the television screen, broadly defined to include television, home video, movies, games, programs, and computers, as either the root of all social ills or the potential savior of society, are reexamined. Wober's ultimately optimistic viewpoint seeks to trigger change in the way we think about and assess television and in turn ensure that screens will serve rather than take advantage of their users.
