Teacher Educators in Vocational and Further Education Sai Loo,2022-02-17 This book includes a range of empirical based

international contributions by the global community of teacher educators and related researchers on the Further Education post compulsory vocational occupational and lifelong learning sector It offers theoretical frameworks and empirical data to delineate issues relating to teacher educators and training in areas regarding policy programmes and pedagogic activities Some of these areas include the education of teachers in vocational education the professionalization of teacher educators in a neoliberal education system and teacher educators perspectives of a training programme for vocational education and training Additionally the areas cover the relevance of coherence in vocational teacher education for teacher educators the use of questioning strategies for teacher educators teacher educators and their initial disciplines journeys and job titles the relevance of craft and reflectivity of teacher educators and the importance of teacher education and mentoring scheme The rationale for this book is that there is a comparative lack of research and related publications on teacher educators and the delivery and design of teacher education facilitation in the sector internationally Also the FE sector is viewed as a backwater of educational research compared to the other sectors

The University of Google Tara Brabazon, 2016-02-17 Looking at schools and universities it is difficult to pinpoint when education teaching and learning started to haemorrhage purpose aspiration and function Libraries and librarians have been starved of funding Teachers cram their curriculum with skill development and generic competencies because knowledge creativity and originality are too expensive to provide to unmotivated students and parents obsessed with league tables not learning Meanwhile the internet offers a glut of information on everything under the sun a mere mouse click away Bored surfers fill their cursors and minds with irrelevancies We lose the capacity to sift discard and judge Information is no longer for social good but for sale Tara Brabazon argues that this information fetish has been profoundly damaging to our learning institutions and to the ambitions of our students and educators In *The University of Google* she projects a defiant and passionate vision of education as a pathway to renewal where research is based on searching and students are on a journey through knowledge rather than consumers in the shopping centre of cheap ideas Angry humorous and practical in equal measure *The University of Google* is based on real teaching experience and on years of engaged and sometimes exasperated reflection on it It is far from a luddite critique of the information age Tara Brabazon celebrates the possibilities of digital platforms in education but deplores the consequences of placing funding on technology and not teachers In doing so she opens a new debate on how to make our educational system both productive and provocative in the post information age

Vocational Education and Training in Times of Economic Crisis Matthias Pilz, 2016-12-20 This book brings together a broad range of approaches and methodologies relevant to international comparative vocational education and training VET Revealing how youth in transition is affected by economic crises it provides essential insights into the strengths and weaknesses of the various systems and prospects of VET in contexts ranging from North America to Europe e g Spain Germany or the UK to Asia such as China Thailand and India Though each country examined in this volume is affected by the economic crisis in a different way the

effects are especially apparent for the young generation In many countries the youth unemployment rate is still very high and the job perspectives for young people are often limited at best The contributions in this volume demonstrate that VET alone cannot solve these problems but can be used to support a smooth transition from school to work If the quality of VET is high and the status and job expectations are good VET can help to fill the skills gap especially at the intermediate skill level Furthermore VET can also offer a realistic alternative to the university track for young people in many countries
