U S Intelligence Report Predictions 2025:

Reducing Uncertainty Thomas Fingar, 2011-07-20 An look at what Intelligence Community analysts do and how and how they are affected by the political context that shapes uses and abuses their outputs The US government spends billions of dollars every year to reduce uncertainty to monitor and forecast everything from the weather to the spread of disease In other words we spend a lot of money to anticipate problems identify opportunities and avoid mistakes A substantial portion of what we spend over 50 billion a year goes to the US Intelligence Community Reducing Uncertainty describes what Intelligence Community analysts do how they do it and how they are affected by the political context that shapes uses and sometimes abuses their output In particular it looks at why IC analysts pay more attention to threats than to opportunities and why they appear to focus more on warning about the possibility of bad things happening than on providing the input necessary for increasing the likelihood of positive outcomes The book is intended to increase public understanding of what IC analysts do to elicit more relevant and constructive suggestions for improvement from outside the Intelligence Community to stimulate innovation and collaboration among analysts at all grade levels in all agencies and to provide a core resource for students of intelligence The most valuable aspect of this book is the in depth discussion of National Intelligence Estimates NIE what they are what it means to say that they represent the most authoritative judgments of the Intelligence Community why and how they are important and why they have such high political salience and symbolic importance The final chapter lays out from an insider s perspective the story of the flawed Iraq Weapons of Mass Destruction WMD NIE and its impact on the subsequent Iran nuclear NIE paying particular attention to the heightened political scrutiny the latter received in Congress following the Iraq NIE debacle Praise for Reducing Uncertainty This is a well documented well written piece by a former high ranking member of the intelligence community Recommended CHOICE Fingar provides a clear and useful tour of how intelligence analysis is produced Political Science Quarterly Tom Fingar provides a frank detailed examination of the challenges to and successes of the U S Intelligence Community In doing so he reveals insights and strategies that directly address our national security needs High stakes examples described by Fingar provide an insider account only he can provide The result is riveting and informative William J Perry Secretary of Defense for the United States 1994 to 1997

Energy and US Foreign Policy Ahmed Mahdi, 2012-01-30 The quest for oil can be seen as a defining principle of global US foreign policy an imperative which has shaped and redefined the practice of American diplomacy especially in the wake of 9 11 which raised questions about the stability of global oil resources In Energy and US Foreign Policy Ahmed Mahdi relates the military expansion of the world s biggest superpower to its quest to gain guaranteed and secure access to the world s most important commodity Examining the foreign policy of George Bush Sr Bill Clinton and George W Bush culminating in the unprecedented military campaigns of the latter Mahdi demonstrates how and why oil has played a central role in US relations with the wider world By dissecting the

failures of the US to secure its own economic and energy interests and by demonstrating the devastating impact this has had on the rest of the world especially in the Middle East Mahdi offers vital analysis for researchers and students of International Relations Diplomacy Security and Energy Studies Domestic Trends in the United States, China, and Iran John IV Gordon, Robert W. Button, Karla J. Cunningham, Toy I. Reid, Irv Blickstein, 2009-01-13 The U S Navy faces uncertainty about the degree to which it will have to prepare for a high end future conflict versus the so called Long War To help the Navy understand how critical near mid and far term trends in the United States China and Iran might influence U S security decisions in general and the Navy s investments in particular RAND examined emerging domestic and regional nonmilitary trends in each of the three countries **Pashtun Identity and Geopolitics in Southwest Asia** Iftikhar H. Malik, 2016-07-18 This book juxtaposes vital issues of Pashtun identity state formation Taliban on both sides of the Durand Line Frontier Crimes Regulation security prerogative and the civil societies of Pakistan and Afghanistan which since 9 11 have been posited in a rather precarious geopolitics **A Pentecostal Political Theology for American Renewal** Steven M. Studebaker, 2016-10-26 This book argues that Christians have a stake in the sustainability and success of core cultural values of the West in general and America in particular Steven M Studebaker considers Western and American decline from a theological and specifically Pentecostal perspective The volume proposes and develops a Pentecostal political theology that can be used to address and reframe Christian political identity in the United States Studebaker asserts that American Christians are currently not properly engaged in preventing America s decline or halting the shifts in its core values The problem he suggests is that American Christianity not only gives little thought to the state of the nation beyond a handful of moral issues like abortion but its popular political theologies lead Christians to think of themselves more as aliens than as citizens This book posits that the proposed Pentecostal political theology would help American Christians view themselves as citizens and better recognize their stake in the renewal of their nation The foundation of this proposed political theology is a pneumatological narrative of renewal a biblical narrative of the Spirit that begins with creation proceeds through Incarnation and Pentecost and culminates in the new creation and everlasting kingdom of God This narrative provides the foundation for a political theology that speaks to the issues of Christian political identity and encourages Christian political participation

Erik J Dahl, David Strachan-Morris, 2025-05-09 The world is facing an ever changing array of complex threats to international security Yet intelligence agencies have a mixed record of anticipating these threats while decision makers have an equally mixed record of effectively acting on predictive intelligence when offered Sometimes intelligence has provided a useful warning such as Russia's invasion of Ukraine but at other times it has failed to anticipate critical events such as the progress of fighting in Ukraine or the likelihood that a mob would carry out a deadly assault on the US Capitol building And at still other times intelligence agencies appear to have provided warning and yet policy makers failed to listen such as before the Hamas attack on Israel on October 7 2023 This book casts new light on past failures and suggests new frameworks for thinking about future threats and challenges Written for academics and practitioners it answers key questions about how intelligence can better inform policy makers and in turn help them anticipate and act upon future threats The chapters in this book were originally published as a special issue of Journal of Policing Intelligence and Counter Terrorism Power and Policy Wesley B. Truitt, 2010-07-01 A qualified expert provides leaders in government and business a much needed primer for accomplishing their most vital task transforming a purpose into policy through the appropriate acquisition and use of power At a time when corporations are reeling from mismanagement a large proportion of homeowners are being forced to default on mortgages and the federal government is rapidly extending its formidable reach into the private sector it is understandable that many Americans no longer trust big business and government institutions To get the United States back on track and to preclude the same kinds of disasters in the future it is imperative for corporate and government leaders as well as private citizens to understand the commonality in all of these events the use and abuse of power This text examines these critical events within a framework of power to explain what motivated our leaders in business and government to make the policies that resulted in these outcomes providing valuable insights on the nature and use of power It then draws lessons today's leaders can use to improve their use of power Examples from current affairs and modern business are discussed in a lively compelling way **The Fall of the West** Nicholas Hagger, 2022-11-25 In The Syndicate 2004 Nicholas Hagger described how in the 20th century a Syndicate of litist mega rich families levelled down the leading Western countries by promoting revolutions wars and independence movements against their empires and planned a New World Order and world

government that would control the earth's resources for their own benefit In *The Secret History of the West* 2005 he traced the Syndicate's roots back to secret Freemasonic organisations and revolutions that undermined the West from the Renaissance to the early 20th century In *The Fall of the West* 2022 the third book in his trilogy on the West Hagger updates the story to include the pandemic and describes how Syndicate driven 21st century events from the War on Terror to Covid have brought the Western financial system to the brink of collapse and shifted power from the West to the East and China In this first impartial attempt to assemble all the evidence to date for the origin of Covid like fitting together available pieces of a jigsaw to reveal the main picture Hagger the first to discover the Cultural Revolution in China in March 1966 finds that the three main features of Covid 19 were man made by American NIAID funded medics in 2002 and patented 73 times since 2008 and seem to have been surreptitiously used as a bio weapon in a Syndicate plan to limit the rise of China and its expanding trade A dangerous new Biological Age has been born and the West faces being levelled down and a sudden fall Hagger sees the post Covid West's dream of creating a good New World Order a vaccine protected democratic presidential part federal world government and World State with sufficient authority to abolish war and solve the world's post Covid problems as being challenged by the self interested Syndicate's levelling down and to survive it first has to go along with the Syndicate's plan for West and East to draw together into an authoritarian world government involving China and democratise later This is a thought provoking work with a prophetic vision of the future

Journal of a Dissenter Chris Wright, 2025-01-20 This is a lengthy intellectual journal by a political radical that ranges over a variety of subjects such as Marxism capitalism history many schools of modern philosophy psychology economics and contemporary American politics It also includes quite a few personal passages but I've kept those only because they express common experiences and youthful psychological tendencies Its most useful content for students might be its many summaries of good historical and scientific scholarship especially in the journal's second half Ultimately the document is a fairly comprehensive expression of a particular society as refracted through an inquisitive and critical mind from the ages of 15 to 44

The End of American World Order Amitav Acharya, 2018-03-16 The age of Western hegemony is over Whether or not America itself declines or thrives under President Trump's leadership the post war liberal international order underpinned by US military economic and ideological primacy and supported by global institutions serving its power and purpose is coming to an end But what will take its place A Chinese world order A re constituted form of

American hegemony A regionalized system of global cooperation including major and emerging powers In this updated and extended edition of his widely acclaimed book Amitav Acharya offers an incisive answer to this fundamental question While the US will remain a major force in world affairs he argues that it has lost the ability to shape world order after its own interests and image As a result the US will be one of a number of anchors including emerging powers regional forces and a concert of the old and new powers shaping a new world order Rejecting labels such as multipolar apolar or G Zero Acharya likens the emerging system to a multiplex theatre offering a choice of plots ideas directors power and action leadership under one roof Finally he reflects on the policies that the US emerging powers and regional actors must pursue to promote stability in this decentred but interdependent multiplex world Written by a leading scholar of the international relations of the non Western world and rising above partisan punditry this book represents a major contribution to debates over the post American era *Apocalypse and Post-Politics* Mary Manjikian,2012-03-16 Mary Manjikian s *Apocalypse and Post Politics* The Romance of the End advances the thesis that only those who feel the most safe and whose lives are least precarious can engage in the sort of storytelling which envisions erasing civilization Apocalypse themed novels of contemporary America and historic Britain then are affirmed as a creative luxury of development Manjikian examines a number of such novels using the lens of an international relations theorist identifying faults in the logic of the American exceptionalists who would argue that America is uniquely endowed with resources and a place in the world both of which make continued growth and expansion simultaneously desirable and inevitable In contrast Manjikian shows apocalyptic narratives explore America as merely one nation among many whose trajectory is neither unique nor destined for success *Apocalypse and Post Politics* ultimately argues that the apocalyptic narrative provides both a counterpoint and a corrective to the narrative of exceptionalism Apocalyptic concepts provide a way for contemporary Americans to view the international system from below from the perspective of those who are powerless rather than those who are powerful This sort of theorizing is also useful for intelligence analysts who question how it all will end and whether America s decline can be predicted or prevented

China-U.S. Economic and Geopolitical Relations Jerald D. Finn,2007 It is hard for the US to ignore China these days with daily stories of product recalls which show that the vast preponderance of products sold in America are actually made in China Add to that the fact that China is leaping forward in scientific and technology research and is fuelled by a boom economy This new book presents analyses of relevant to China US economic and geopolitical relations *The Euro-Atlantic System in a Multipolar World* József M. Fiszer,Jakub Wódka,Paweł Olszewski,Tomasz Paszewski,Agnieszka Cianciara,Agnieszka Orzelska-Staczek,2015-09-17 Euro Atlantic system and especially the relationship between the US and the European Union and NATO cooperation with the EU despite the difficulties are and will be one of the most important elements in the process of building a new global multipolar order However the United States and the European Union should pursue a more correlated international policy based on a realistic and idealistic vision of the world The world needs the Euro

Atlantic community as there is no and there won't be in the near future such integrated community of values and interests in the new emerging global order. The above problems are described in this monograph which was written in the framework of the research project called The role of the Euro Atlantic system in a multipolar world in the context of the emerging new global order.

The Future of the Jews Stuart Eizenstat, 2014-07-02 In *The Future of the Jews* Stuart E. Eizenstat, a senior diplomat of international reputation surveys the major geopolitical, economic and security challenges facing the world in general and the Jewish world and the United States in particular. These forces include the shift of power and influence from the United States and Europe to the emerging powers in Asia and Latin America, globalization and the new information age, the battle for the direction of the Muslim world, nontraditional security threats, changing demographics which pose a particular challenge for Jews worldwide and the rise of a new anti-Semitism that seeks to delegitimize Israel as a Jewish state. He also discusses the enduring nature of and challenges to the strategic alliance between the United States and Israel. In an extensive new foreword to the paper edition, Eizenstat addresses crucial developments affecting the Jewish people since the book first appeared in 2012, including increasing tensions in the Middle East, the digital revolution and NSA revelations, declining optimism on the Arab Spring, the Israeli-Palestinian peace process, the revival of anti-Semitism. In addition, he reflects on the changing identity of American Jews as revealed by the Pew Center Survey of U.S. Jews 2013. Eizenstat's provocative analysis will be of interest to everyone concerned about the future of Jews worldwide and in Israel and the United States role in a world that is confronting unprecedented simultaneous cataclysmic changes.

Transformations of Warfare in the Contemporary World John C. Torpey, David Jacobson, 2016-06-03 Today's warfare has moved away from being an event between massed national populations and toward small numbers of combatants using high-tech weaponry. The editors and contributors to the timely collection *Transformations of Warfare in the Contemporary World* show that this shift reflects changes in the technological, strategic, ideological and ethical realms. In his concluding remarks, David Jacobson explores the extent to which the contemporary transformation of warfare is a product of a shift in the character of the combatants themselves. Amazon.com
