Advanced Introduction to the Creative City Charles Landry,2019 Written by the leading authority Charles Landry inventor of the concept of the creative city this timely book offers an insightful and engaging introduction to the field Exploring the development of the concept it discusses the characteristics of cities the qualities of creativity the creative and regeneration repertoires and the gentrification dilemma Other key topics of this definitive work include ambition and creativity cities and psychology digitization and the creative bureaucracy *Enhancing the City*. Giovanni Maciocco,Silvia Serreli,2009-09-30 Departing from a survey on the post modern landscapes of tourism this book explores the transformations

the city has undergone and the way it has become a simulacrum offered to tourists spectacularised with the aim of increasing its capacity for attraction. The experiences dealt with in the papers of authors belonging to different disciplinary fields emphasise the city's tendencies to create stage set contexts of the private type be it historic quarters, theme parks or hypermarkets. Issues like aestheticisation, thematisation and genericity are dealt with conceptual categories that highlight the weak resistance cities put up against the rules of the leisure industry and more generally speaking the consumer economy. The book inquires into the capacity of the urban and territorial project to construct a perspective for a public dimension of space. This is linked with ethical action of the project involving an active relationship with places and a capacity to understand the dynamics of different urban populations. In this sense capacity for innovation and creativity can contribute to transforming islands of leisure into places of the city and consumers into citizens.
