The Psychology of Family Law Eve M. Brank, 2019-04-09 Winner 2021 Lawrence S Wrightsman Book Award given by the American Psychology Law Society Bridges family law and current psychological research to shape understanding of legal doctrine and policy Family law encompasses legislation related to domestic relationships marriages parenthood civil unions guardianship and more No other area of law touches so closely to home or is changing at such a rapid pace in fact family law is so dynamic precisely because it is inextricably intertwined with psychological issues such as human behavior attitudes and social norms However although psychology and family law may seem a natural partnership both fields have much to learn from each other Our laws often fail to take into account our empirical knowledge of psychology falling back instead on faulty assumptions about human behavior This book encourages our use of psychological research and methods to inform understandings of family law It considers issues including child custody intimate partner violence marriage and divorce and child and elder maltreatment For each topic discussed Eve Brank presents a case statute or legal principle that highlights the psychological issues involved illuminating how psychological research either supports or opposes the legal principles in question and placing particular emphasis on the areas that are still in need of further research The volume identifies areas where psychology practice and research already have been or could be useful in molding legal doctrine and policy and by providing psychology researchers with new ideas for legally relevant research
